ABSTRACT

"Snapshot '94," the seventh edition of this publication, provides information about students, student performance, staffing, and financing of Texas public schools. This annual summary is a useful tool for those interested in evaluating the progress of Texas school districts toward providing an excellent and equitable education for all students. The report begins with an examination of state-level data and concludes with detailed information about each of the state's 1,046 school districts. The state-level section, "Statistical Highlights," discusses the broad areas of administrative units, students, student performance, staff, and finances and covers both the current year and historical trends. The "Detailed Statistics" section summarizes 87 data items for groups of school districts categorized by size, rural versus urban classification, tax effort, property wealth per pupil, and Education Service Center region. The distribution of these items is then presented in tables showing their highest, lowest, and median values as well as values for selected percentiles. Individual school district values for all data items are listed, followed by a state summary. During the 1993-94 school year, Texas public school students showed performance gains on the Texas Assessment of Academic Skills and college admissions tests. Much work remains to be done to close the gap in performance for economically disadvantaged and minority students. Five appendixes contain definitions of the data items, the sources of data, a list of bibliographic sources, end notes, and a list of school districts in alphabetical order. (Contains 32 exhibits and 9 references.) (SLD)

## 1993–94 School District Profiles

Texas Education Agency

Division of Performance Reporting

Office of Policy Planning & Information Management

Winter 1995

*Snapshot '94*, the seventh edition of this publication, provides information concerning students, student performance, staffing, and financing of Texas public schools. This annual summary is a useful tool for all individuals interested in evaluating the progress of Texas school districts toward providing an excellent and equitable education for all students.

During the 1993–94 school year, Texas public school students showed performance gains on both the Texas Assessment of Academic Skills and college admissions tests. However, much work remains to be done to close the gap in performance for economically disadvantaged and ethnic minority students. Closing this gap continues to be a primary focus for Texas educators.

Over the last three years there has been increased flexibility for public schools to design programs to meet student needs. Along with this increase in local control comes the responsibility to implement local accountability systems to complement the state system. Each of us must take an active part in these endeavors. I encourage you to become familiar with the information contained in *Snapshot '94*. This material is essential to understanding the environment in which Texas educators perform, the progress they have made, and the work that remains to be done.

Sincerely,

Lionel R. Meno
Commissioner of Education

# ACKNOWLEDGMENTS

The preparation of this document and the related *Pocket Edition* would not have been possible without the assistance of many people. First, appreciation goes to staff of local school districts and regional Education Service Centers who compile and report the vast majority of the information contained in this publication. The quality of the data they provide directly affects the quality and usefulness of this document.

Next, many Texas Education Agency staff, while not part of the project staff, deserve credit for so freely contributing their time to this effort. These include Ricky Arredondo, Rick Battaile, Omar Garcia, Linda Hargrove, Shannon Housson, Bill Insko, David Jacob, Shirley McLean, Lynn Mellor, Esteban Reyes, Maureen Scheevel, Rob Scott, Trish Smith, Sedra Spano, Karen Willis, Joe Wisnoski, and photographer Jack Brown.

Thanks also go to the students and staff of Josephine Houston Elementary, Bedichek Middle School, Dobie Junior High, and Reagan High School of the Austin Independent School District for allowing us to use their photographs on the cover.

# Introduction

*Snapshot '94: 1993–94 School District Profiles* provides a detailed look at public education in the State of Texas for the 1993–94 school year. As diverse as the state itself, school districts in Texas exhibit extreme differences in almost every way: size, property wealth, percentage of low-income students, and the ethnic composition of students and staff. *Snapshot '94* captures this diversity and provides readers with the basic information needed to assess the differences, and the strengths and weaknesses, among the various school systems.

Published annually since 1987–88, *Snapshot* presents a variety of information in a consistent format. Changes in this edition are minor. Some changes are due to modifications in the student assessment program or to revisions in the data collection system. Others occurred in order to present items in a format consistent with their use in the 1994 accountability rating system for Texas public schools and school districts. An evaluation form, located just inside the front cover, provides an opportunity for readers to influence future editions.

## Organization of this Book

*Snapshot '94* begins with an examination of state-level data and concludes with detailed information about each school district.

The state-level section *Statistical Highlights*, discusses the broad areas of administrative units, students, student performance, staff, and finances, and covers both the current year and historical trends. Graphic presentations are included in this section.

The *Detailed Statistics* section provides extensive school district information on the same broad areas discussed in the *Statistical Highlights*. This section consists of three parts.

First, 87 data items are summarized for groups of school districts categorized by size, by a rural versus urban classification, by tax effort, by property wealth per pupil, and by Education Service Center (ESC) region.

Second, the distribution of these items is presented in tables showing their highest, lowest, and median values. In addition, values at the 1st, 5th, 10th, 25th, 75th, 90th, 95th, and 99th percentiles are shown. This section is labeled *Distribution Statistics*.

Third, individual school district values for all data items are listed, followed by a state summary. This section, titled *District Detail*, is in county name order with districts arranged alphabetically within each county.

Several new items appear in this edition: attendance rate, TAAS performance by subject area, and district fund balance information. Four items have been dropped; two pertaining to the teacher career ladder and two describing state financial resources distributed to districts. *Exhibit C* in the *End Notes* provides a crosswalk of prior to current year data items.

The 87 items span six pages; therefore, a new set of districts is presented every sixth page. While some analysis of state and group level data is provided in the *Statistical Highlights*, no interpretation of the *District Detail* information is attempted. Readers should use discretion in drawing conclusions from the data presented.

*Snapshot '94* concludes with five appendices. Definitions of the 87 data items are provided in sequence by the item number in the *Item Definitions* appendix. The second appendix, *Data Sources*, lists the sources of data in alphabetical order by the abbreviated labels used throughout the document. Each major source of data is described and accompanied by a listing of associated data items and exhibits. A selected list of *Bibliographic Sources* follows in the third appendix.

*End Notes*, the fourth appendix, is intended to clarify terms that are not thoroughly addressed in other parts of the document. The final appendix lists school districts in alphabetical order by name. This appendix, *District Listing*, will help readers locate a particular district in the *District Detail* by relating the district name to the appropriate county.

## Overview of Data Sources

The vast majority of data in this document is reported to the Texas Education Agency (TEA) by school districts. The fall 1993 data collection of the Public Education Information Management System (PEIMS) is one primary source of data. Information obtained from the Property Tax Division of the Comptroller of Public Accounts (CPTD) for the 1993 calendar year, and student test scores which are reported to the TEA by the testing companies are also included.

# Statistical Highlights

## Agencies of Public Education

### Central Education Agency

The Central Education Agency, composed of the commissioner of education, the State Board of Education (SBOE) and the Texas Education Agency (TEA), guides and monitors public education in Texas.

The SBOE provides leadership and state-level administration for Texas public education. The commissioner of education and the TEA staff work closely with the board to implement education policy.

The SBOE is comprised of 15 elected members representing various regions of the state, one of whom is appointed chair by the governor. In January 1995, Governor George Bush appointed Dr. Jack Christie to a two-year term as chairman of the State Board of Education. A map showing 1993–94 SBOE district boundaries is included in the *End Notes*.

The TEA, located in Austin, Texas, is the administrative unit of the Central Education Agency. Under the management of the commissioner of education, the TEA accredits school districts, operates research and information programs, monitors for compliance with federal and state guidelines, and serves as a fiscal agent for the distribution of state and federal funds. The TEA operational costs are supported by both state and federal funds. In 1993–94, approximately 1,030 staff were employed at the TEA. Less than half of all agency positions are funded with state dollars (46 percent). The remaining 54 percent are funded from federal contracts and dedicated fees (43 percent and 11 percent, respectively).

### Local School Districts

While the SBOE provides leadership for education, much of the control of public schools remains with the 1,046 local school districts. Districts serve students in grades pre-kindergarten through twelve. There are over 6,300 public school campuses in Texas, and over 60 percent of these serve students in the elementary grades.

The number of campuses in a district varies greatly depending primarily on the total number of students enrolled in the district. The majority of districts, almost 60 percent, have three or fewer campuses—typically one elementary school, one middle school, and one high school. *Exhibit 1* presents counts and enrollments for all campus types. Campuses are typed according to the range of grades they offer. *Exhibit B* in the *End Notes* provides more information about the grades offered in each of these categories.

**EXHIBIT 1**
**Enrollment by Campus Type**

| Campus Type | Total Enrollment | # of Campuses | % of Campuses | Median Enrollment | Smallest to Largest |
|---|---|---|---|---|---|
| High School | 900,980 | 1,176 | 18.5% | 406 | 1 to 3,997 |
| Junior High School | 206,361 | 313 | 4.9% | 676 | 21 to 2,006 |
| Middle School | 567,631 | 881 | 13.9% | 630 | 1 to 1,808 |
| Elementary School | 1,855,138 | 3,512 | 55.4% | 519 | 1 to 1,646 |
| Elementary & Secondary Combined (K-12) | 71,729 | 461 | 7.3% | 93 | 1 to 2,008 |
| State of Texas | 3,601,839 | 6,343 | 100.0% | 499 | 1 to 3,997 |

*Schools in Texas range in size from 1 to 3,997 students. Half of the campuses in the state have fewer than 499 students and half have more than this amount. Elementary schools make up 55 percent of all campuses in Texas and serve 52 percent of all students.*

Districts in Texas are classified according to governance structure and the ability to raise local revenue. The three types of districts are defined as follows:

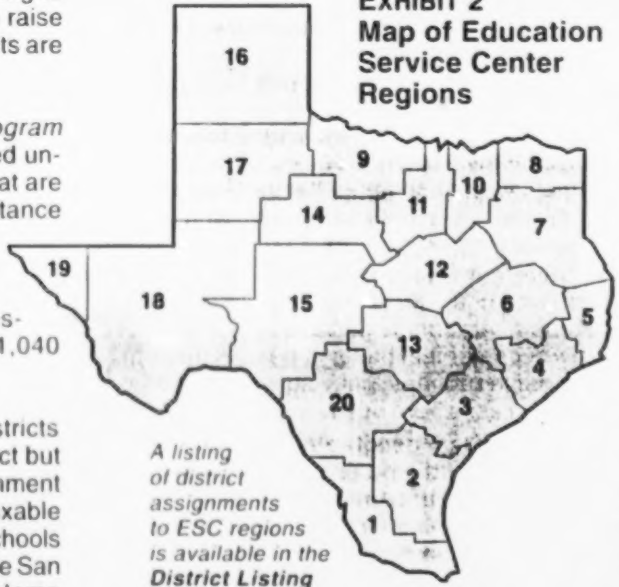
1) *Regular Foundation School Program (FSP) Districts*, or districts created under general statutory authority that are eligible for state funding assistance under the Foundation School Program. These districts may also tax property within their geographic boundaries. Most districts fall into this category—1,040 or 98 percent in 1993-94;

2) *Special Statutory Districts*, or districts created by a special legislative act but not administered by a state government agency. These districts have no taxable property. They include the public schools associated with military bases in the San Antonio area and the Masonic Home in Fort Worth. There are six of these districts, and;

3) *State-Administered Districts*, or districts created by legislative act which are both funded and administered by a state government agency. Most of these 11 districts are administered by the Texas Department of Mental Health & Mental Retardation.

*Snapshot '94* includes data for the 1,046 regular FSP and special statutory districts only. State-administered districts do not have the same reporting requirements and are not included.

### EXHIBIT 2
### Map of Education Service Center Regions



*A listing of district assignments to ESC regions is available in the* ***District Listing*** *appendix.*

## *Regional Education Service Centers*

The 20 regional ESCs serve the school districts within defined geographic boundaries. Differences exist among the ESCs in terms of the number and characteristics of the member districts. However, all ESCs are expected to provide services that support improved student achievement in the districts within their boundaries. Assistance is targeted to those campuses in the greatest need of improvement and support. *Exhibits 2* and *3* provide information about the locations and sizes of ESCs.

The service centers work closely with districts to provide technical assistance in the areas of accreditation and curriculum, professional staff development and administrator training, and the implementation of PEIMS. Service centers also provide schools with instructional media, data processing services, and assistance in program improvement in areas such as bilingual education, special education, gifted and talented education, and programs for at-risk students.

### EXHIBIT 3
### Number of Districts by Education Service Center Region

| Region | | Number of Districts | Region | | Number of Districts | Region | | Number of Districts |
|---|---|---|---|---|---|---|---|---|
| 1 | Edinburg | 38 | 8 | Mt. Pleasant | 48 | 15 | San Angelo | 43 |
| 2 | Corpus Christi | 42 | 9 | Wichita Falls | 40 | 16 | Amarillo | 65 |
| 3 | Victoria | 41 | 10 | Richardson | 79 | 17 | Lubbock | 61 |
| 4 | Houston | 55 | 11 | Fort Worth | 77 | 18 | Midland | 33 |
| 5 | Beaumont | 29 | 12 | Waco | 78 | 19 | El Paso | 13 |
| 6 | Huntsville | 57 | 13 | Austin | 56 | 20 | San Antonio | 50 |
| 7 | Kilgore | 98 | 14 | Abilene | 43 | | | |
| | | | | | | | Total | 1,046 |

In 1994, Commissioner Lionel R. Meno continued funding to provide 60 field service agents, 20 Partnership Schools facilitators, and 20 regional certification officers to the ESCs. The field service agents work closely with school districts to help solve problems related to student achievement. The 20 Partnership Schools facilitators work with the 94 Partnership Schools to facilitate school improvement at those campuses. The regional certification officers provide technical assistance to any school within the region on teacher certification matters. Commissioner Meno approves services and budgets of ESCs, as well as performance contracts.

Statistics for all 87 items are summarized to the regional level in the *Detailed Statistics*. Additional information about the service centers is available in the *Biennial Report on Education Service Centers* published by the agency.

The various agencies of public education work together to provide a successful system of instruction in an extremely diverse state. The central education agency, the local school districts, the ESCs, and a number of other associations and organizations committed to educational excellence strive to meet the challenges of providing appropriate educational services to all the school children of Texas.

## *Students*

### *Diversity*

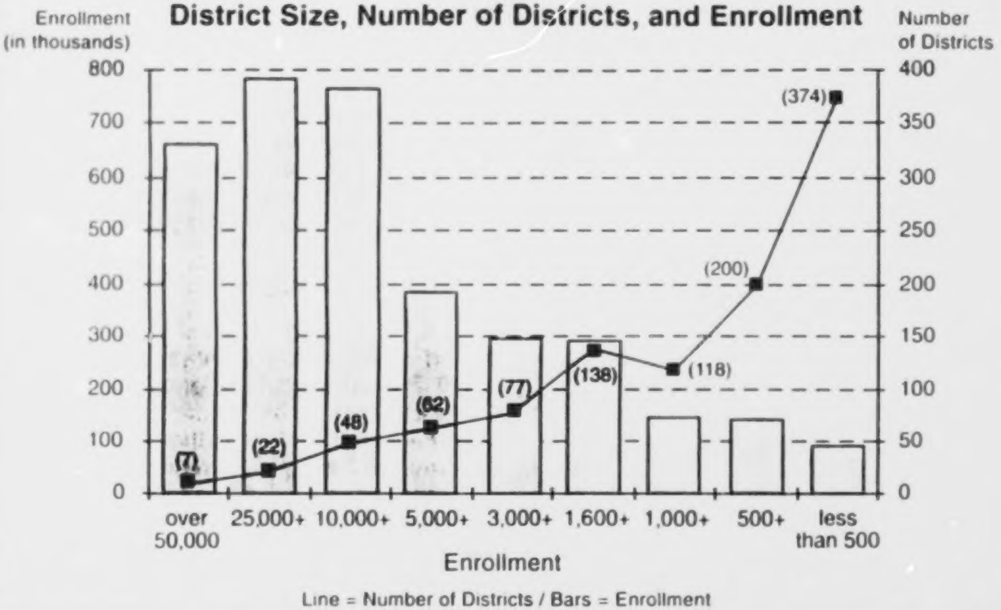
The 3.6 million public school students across Texas are served in markedly differing environments. For example, in 1993–94, only three students attended school in the Allamoore Independent School District located in far west Texas, while over 200,000 students received instruction at 256 school sites in the Houston Independent School District, the largest district in the state. The seven largest districts, those with over 50,000 students each, serve 18 percent of all public school students, while the smallest 374 districts, representing 36 percent of all districts, enroll less than three percent. The inverse relationship between the number of districts and the number of students enrolled is a defining characteristic of the Texas public school system. *See Exhibits 4 and 5.*

The ethnic distribution of students varies greatly across the state and appears to depend in part on geography and on the size of the district and type of community it serves. Statewide, approximately 52 percent of all students are minority. Districts in major urban areas serve an 80 percent minority student population while districts in rural areas serve a population that is only 30 percent minority. The highest percentages of Hispanic students are found in the Edinburg ESC region at the southernmost tip of the state (95 percent), and in the El Paso region in far west Texas (85 percent). The largest percentage of African American students, 30 percent, is in the Beaumont region. The highest percentages of white students are found in the north central and eastern regions of the state.

The proportion of students with special needs also varies across the state. One indicator of need is the economic status of the child. Although Texas does not levy personal income taxes and has little information about family earnings, student eligibility to participate in the national free or reduced-price lunch program is one measure of student economic status. Approximately 45 percent of Texas public school children are eligible to participate in this program. Higher concentrations of economically disadvantaged students are found in major urban districts and in districts with higher percentages of minority students. The lowest percentages of economically disadvantaged students can be found in districts suburban to the major urban districts. As one would expect, districts with the least property wealth have higher percentages of economically disadvantaged students.

Student participation in special programs such as bilingual or career and technology (vocational) education differs by community type, district size, and geographic location. A greater percentage of students in rural districts are enrolled in career and technology courses—19 percent—compared with 11 percent in major

### EXHIBIT 4
### District Size, Number of Districts, and Enrollment



*The seven largest districts have a combined enrollment of over 665,000 students while the 374 smallest districts enroll fewer than 100,000 students.*

urban districts. By far, the highest percentages of students in bilingual or English as a second language (ESL) programs are enrolled in the Edinburg and El Paso service center regions with 38 percent, and 24 percent, respectively. These figures are well above the state average of 10 percent.

## Student Population Growth

During 1993-94, the 1,046 regular and special statutory districts in Texas served 3,601,839 students in pre-kindergarten through grade 12. This number of students represents a 1.9 percent increase from the prior year, a lower rate of growth than the 2.2 percent increase experienced between 1992 and 1993. Of all students in 1993-94, 84 percent were served the previous year and the remaining 16 percent were newly enrolled students.

Although the overall rate of growth was lower than in recent years, the majority of districts continue to show enrollment increases. In 1993-94, 69.3 percent of the districts in the state reported enrollment increases compared to 69.6 percent with increases in 1992-93, and 68 percent in 1991-92. As in 1993, districts in suburban areas around major urban and other central cities experienced higher rates of increase, nearly 2.5 percent for both, while major urban and rural districts averaged smaller increases, 1.3 percent and 1.5 percent, respectively. Urban areas showed greater growth than in 1993 (1.3 versus 0.8 percent) while rural areas grew at a slower pace than the year before (1.5 versus 1.8 percent).

Statewide, growth in the minority student population continues to exceed non-minority growth. Minority students now comprise 52.3 percent of the population, compared with 51.6 percent in 1992-93. Growth in the minority student population was 3.2 percent, with the greatest increase, 3.9 percent, occurring in the Asian/

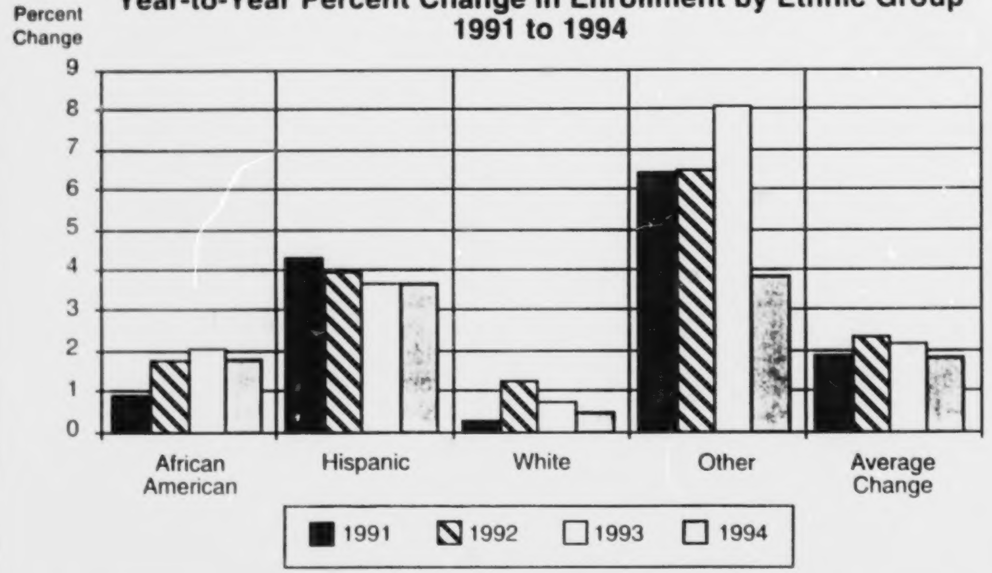
### EXHIBIT 6
### Year-to-Year Percent Change in Enrollment by Ethnic Group 1991 to 1994



*The average change in enrollment from 1993 to 1994 was 1.9 percent. Although the category of "other," containing Asian/Pacific Islanders and Native American students, continues to exhibit the greatest percentage increase, it is the Hispanic population that is driving statewide growth. Texas' total enrollment increased by 66,097 students from 1993 to 1994. Hispanic students accounted for 68 percent of this increase.*

Pacific Islander and Native American populations. These populations, categorized in this document as "other," now account for 2.5 percent of all students. The number of African American students grew by 1.8 percent, representing a net increase of 9,096 students. African Americans comprise 14.3 percent of the total public school population as they did in 1993 and 1992.

The Hispanic rate of growth is 3.7 percent, as it was in 1992. Although this rate of growth is not the highest among the ethnic groups, it is the Hispanic population that continues to drive statewide growth. Of the 66,097 student increase in Texas' total enrollment, 68 percent or 45,109 were Hispanic. Hispanic students now account for 35.5 percent of the total number of students.

In contrast, the white population grew by only 0.5 percent, or by 8,547 students. This rate of increase is the smallest among the ethnic groups and it represents a decreasing rate of growth for this population. In 1993, white students increased by 0.85 percent. *See Exhibit 6.* The overall percent of white students in the total student population continues to drop; it has changed from 49.0 percent in 1992, to 48.4 percent in 1993, to 47.7 percent this year.

## *Growth by Grade*

The highest rates of growth by grade occurred in pre-kindergarten and in grades 8 and 9. Pre-kindergarten alone grew by almost 7,000 children, or by 7.3 percent over 1993. In general, all early childhood enrollments continue to be high—early education, pre-kindergarten, and kindergarten together grew by 3.6 percent. In the upper grades, enrollment in grades 8 and 9 increased by 27,453 students, a gain of 4.9 percent over 1992–93. Slightly more students were added to the ninth grade than the eighth; 14,000 and 13,000, respectively.

Slightly negative rates of growth are found in grades 1, 2, and 12. Elementary growth in grades 1 through 5 was the lowest of all grade spans, at 0.7 percent. High school enrollments were up 2.2 percent, the third consecutive year the total number of 9th through 12th graders increased. The 14,000 student increase in grade 9 accounts for the majority of this growth and offsets the 1,400 student decline in grade 12.

Other than pre-kindergarten and kindergarten, grades 1 and 9 have the largest percentage of students new to Texas public schools, 13.4 percent and 11.2 percent respectively. These grades are the traditional entry points for students previously enrolled in private schools.

On average, the pre-kindergarten and kindergarten grades have higher percentages of minority students, 60.6 percent, than the state (52.3 percent). Statutory requirements for pre-kindergarten education stipulate that limited English proficient (LEP) and/or economically disadvantaged pupils are to be identified and served. These characteristics are highly correlated with ethnicity in Texas. In grades 1 through 6, the ethnic distribution is very similar to the state, while the secondary grades (grades 7–12) have slightly more white students, 49.7 percent compared with 47.7 percent statewide.

## Retention

A strong predictor of negative educational outcomes, such as dropping out of school, is whether or not a child has been retained in grade. Because of this relationship, recent legislation has required disclosure of retention decisions. Beginning in October 1992, districts report the status of students at the end of the school year with regard to promotions or retentions. From these data it is possible to determine the number of students who moved to the next grade, and the number who will repeat a grade. The data in this edition of *Snapshot* show the placement decisions made at the end of the 1992–93 school year and reported to the agency in the summer of 1993. Placement decisions reported by districts are subsequently adjusted at the state level based on an examination of actual grade-level repeaters in the 1993–94 school year.

The adjusted data show that at the end of the 1993 school year, 174,133 students were retained in grade. These retainees represent 5.1 percent of the kindergarten through 12th grade enrollment. The retention rate for students in special education programs was 6.5 percent compared to 4.9 percent for non-special education students.

Grade 9 continues to exhibit the highest percentage of non-advanced students, with 18.7 percent repeating the grade. Among the elementary grades, the number of retentions and the rate were highest in grade 1 with a 7.9 percent retention rate. Many districts operate a transitional first grade which requires that a student stay two years in that grade before moving to grade 2. State Board of Education rules prohibit more than one retention in kindergarten through grade 4, and more than one retention in grades 5 through 8. In general, non-advancement rates are higher in high school grades than in the elementary or middle grades.

Hispanic students represent 47.0 percent of all students retained this year. This population of students has the highest retention rate of any ethnic group, 7.1 percent. With the exception of kindergarten, where over half of all retained students are white, larger numbers of Hispanic students are retained at each grade than students from any other ethnic group. Closely following the Hispanic rate of retention is the African American student group with 7.0 percent retained. Thirty percent of all students retained were white, although this group's retention rate was only 3.2 percent.

Slightly over 60 percent of students retained were male. Male students are the larger percent of retainees for each grade, for each ethnic group, and for students in special education programs. The greatest gender gap exists among white students, with 62.5 percent of those retained being male, and 37.5 percent female.

Being retained in grade makes students over-age for grade unless they successfully complete an accelerated program to place them back with their on-grade-for-age schoolmates. Over-age students are at greater risk of dropping out of school and have a greater likelihood than other students of being retained, making them yet another year older than their classmates. Approximately 16 percent of all regular education students are over-age, but among the retained regular education students, 27 percent were over-age.

Additional information about student retention is available in the report *Grade Level Retention of Texas Students 1992–93 and 1993–94, January 1995* published by the agency.

## *Dropouts*

The dropout rate for 1992–93 has been computed two ways. The previous method of calculating dropouts, which is comparable to prior years, produces a state dropout rate of 3.3 percent. The revised methodology yields a dropout rate of 2.8 percent and is based on a total of 43,402 dropouts in grades 7 through 12 for the 1992–93 school year.

Differences between the previous and the revised methodology center around an enhanced statewide recovery process primarily aimed at locating students reported as dropouts, but found in attendance in another district. Secondly, the two methods differ due to an improvement in the denominator of the calculation. The revised methodology uses a count of 7th–12th graders computed from full year attendance data, rather than the static count of students enrolled in these grades reported in the fall. This provides a cumulative count of 7th–12th graders with which to compare the cumulative count of 7th–12th grade dropouts.

Dropout rates presented in the *District Detail* and discussed below are based on the revised method. These rates are not comparable to the dropout data published in previous editions of *Snapshot*. Information about dropout rates using the previous method of calculation and other dropout information is available in the report *1992–93 Report on Texas Public School Dropouts, January 1995* published by the agency.

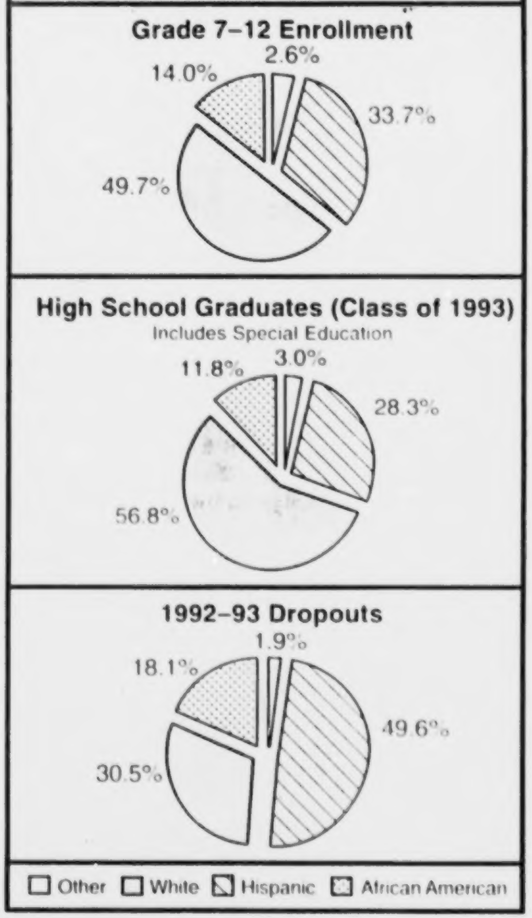
All ethnic groups have experienced declines in the number of dropouts reported; however, the Hispanic and African American ethnic groups continue to be disproportionately represented among dropouts. As shown in *Exhibit 7* almost half of the reported dropouts were Hispanic, a little less than one-third were white, and 18 percent were African American.

Dropout rates for both Hispanic and African American students remain higher than the state average of 2.8 percent. For 1992–93, the Hispanic dropout rate was 4.2 percent; for African American students, 3.6 percent. Hispanic and African American students have consistently exhibited the greatest dropout rates among all the ethnic groups. The dropout rate for Asian/Pacific Islander and Native American students in 1992–93 was 2.0 percent, and for white students, 1.7 percent. The gap between the white and non-white dropout rates has diminished. In 1987–88 the difference between dropout rates for minority and white students was 3.4 percentage points. In 1992–93 this difference has closed to 2.2 percentage points. As school and district accountability ratings include the evaluation of dropout rates for all student groups, disparities between the rates should continue to decline.

Consistent with data reported over the last six years, more males than females dropped out during 1992–93 (53 percent versus 47 percent). This is also the case within each ethnic group. Hispanic males, with a dropout rate of 4.3 percent, have the highest rate of all ethnic and gender groups.

The number of dropouts is greatest at the 9th grade overall, and for each ethnic group. More than half of all dropouts left during either their

**EXHIBIT 7**
**Student Populations by Ethnic Group**



*Although minority students account for slightly more than half the student population in grades 7–12, they are under-represented among the graduates and over-represented among the dropouts*

9th or 10th grade year. Both the 9th and 12th grades show the highest dropout rates, 4.1 percent for each. The greatest rate of female dropouts is found in the 12th grade.

Approximately 30 percent of all dropouts are identified as economically disadvantaged, and a staggering 79 percent are over-age for grade. The dropout rate for students receiving special education services (2.3 percent) is consistently lower than the state rate. *See Exhibit 8.*

Urban districts and districts with high percentages of minority students have the highest dropout rates. *Exhibit 9* on page 10, depicts the relationship between community type and dropout rates. Both minority students and economically disadvantaged students are found in greater numbers in urban areas, which may partially explain these differences in rates.

As a group, districts with the greatest student enrollment have consistently shown greater dropout rates than smaller districts. This is likely due to their proximity to urban areas. However, the relationship between dropout rates and campus size does not show the same pattern. Although campuses that serve over 1,000 students have a higher than average dropout rate, the rate among the small schools (fewer than 250 students) is even greater. Analysis reveals that only half of the small schools with dropouts are in rural areas, indicating that small campuses in non-rural areas increase the average dropout rate for this group.

## EXHIBIT 8

### 1992–93 Dropouts by Grade Level for Selected Student Characteristics

| Grade Level | Total Dropouts | Male | Female | Special Education | Economically Disadvantaged | Not on Grade |
|---|---|---|---|---|---|---|
| 7th | 1,766 | 881 | 885 | 162 | 846 | 1,022 |
| 8th | 2,840 | 1,389 | 1,451 | 274 | 1,290 | 1,922 |
| 9th | 13,110 | 7,280 | 5,830 | 1,278 | 4,583 | 11,741 |
| 10th | 9,489 | 5,277 | 4,212 | 958 | 2,793 | 8,191 |
| 11th | 8,166 | 4,417 | 3,749 | 654 | 2,023 | 6,605 |
| 12th | 8,031 | 3,937 | 4,094 | 385 | 1,980 | 4,792 |
| TOTAL | 43,402 | 23,181 | 20,221 | 3,711 | 13,515 | 34,273 |

*The typical dropout in Texas is Hispanic, over-age for grade by at least one year, in the 9th or 10th grade at the time of school departure, and is probably male. Seventy-nine percent of the students who dropped out were over-age for their grade, indicating they were retained one or more times over their school careers.*

By applying the statewide annual dropout rate of 2.8 percent to each grade total in grades 7 through 12, the estimated longitudinal dropout rate is calculated as 15.8 percent. This implies that for every 1,000 students enrolled in the 7th grade in 1993–94, only 842 would be enrolled in the 12th grade five years later. Using the previous method of calculating dropouts, the annual statewide rate of 3.3 percent results in an estimated longitudinal rate of 18.4 percent. This means only 816 of every 1,000 students enrolled in the 7th grade in 1993–94 would be enrolled in the 12th grade five years later.

## Graduates

During the 1992–93 school year 161,393 seniors graduated from Texas public schools, an increase of 2.0 percent over the number graduated in 1991–92. Of the total graduates, 11,818 were identified as special education students. Statewide, white students accounted for 56.8 percent of all graduates, Hispanic students, 28.3 percent, African American students, 11.8 percent, and other students, 3.0 percent. Refer to *Exhibit 7* for a breakdown of the ethnicities of the total 7th through 12th grade student population compared with graduates and dropouts.

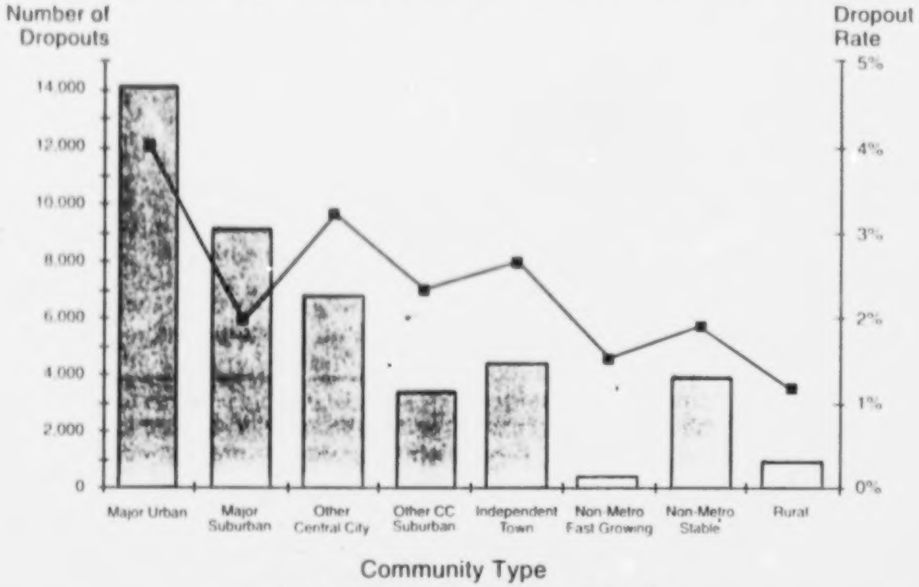
From a longitudinal perspective, the total number of graduates in 1992–93 (including special education graduates) is 66.0 percent of all 7th graders enrolled in 1987–88. This is an increase from the previous year when 64.2

percent of 1986–87 enrolled 7th graders graduated. The majority of the 83,000 students lost between the 7th and 12th grades are dropouts; a small percentage are students who did not pass the exit-level state assessment. It is probable that some of these students enroll in General Educational Development (GED) programs and later earn their certificate of high school equivalency. Recent research indicates almost 4 percent of the dropouts reported in 1992–93 had obtained a certificate of high school equivalency by the spring of 1994. GED completion notwithstanding, the high percentages of non-graduates raise major concerns among educational policy makers.

The graduation rates presented in prior editions of *Snapshot* were not computed this year. Beginning with 1993–94, graduation rate is no longer an indicator on the Academic Excellence Indicator System (AEIS) Reports. The prior methodology for computing graduation rates led to inaccuracies in certain situations and was not replicated this year. Exploration of improved counts of the population eligible to graduate will likely restore a graduation rate measure in the future.

**EXHIBIT 9**

**1992–93 Dropouts and Dropout Rates, by Community Type**



Line = Dropout Rate / Bars = Number of Dropouts

*In 1992–93, 32 percent of all dropouts were concentrated in the 9 districts classified as major urban. Although the number of reported dropouts continues to decline, the distribution pattern reflected in this exhibit has remained stable since the initial collection of dropout information in 1987–88.*

# Student Performance

## Texas Assessment of Academic Skills

The Texas Assessment of Academic Skills (TAAS) testing program has been in place since the 1990–91 school year. This program, as its name implies, emphasizes the assessment of academic skills and focuses on students' higher order thinking and problem-solving skills. Previous statewide assessment programs [the Texas Assessment of Basic Skills (TABS) 1980–1985, and the Texas Educational Assessment of Minimum Skills (TEAMS) 1985–1990] measured minimum basic competencies in writing, reading, and mathematics.

The TAAS results reported in this edition of *Snapshot* are not directly comparable to those reported in previous editions due to changes in the assessment program and the need to reflect in this publication the results used for statewide accountability of public schools. As described below, changes to the assessment program include expanding the number of grades tested and re-calibrating the tests at the lower grades to align them to the difficulty level of the 10th grade (exit) test. In addition, the statewide accountability system for public schools and districts examined TAAS performance of students by subject area and provided an adjustment for student mobility.

In response to legislation passed in the spring of 1993, a number of changes occurred in the TAAS program. The legislation required that, beginning in the spring of 1994, the TAAS reading and mathematics assessments be administered at grades 3, 4, 5, 6, 7, 8 and 10 (exit-level). This expands the number of grades tested from 4, 8, and 10 in the spring of 1993. The TAAS writing assessment continues to be administered to students in grades 4, 8, and 10 only.

The new statute also required that student achievement be comparable across grade levels; thus the passing standards at grades 3 through 8 in reading and mathematics were aligned with the passing standard of the exit-level tests. A score called the Texas Learning Index (TLI) was developed to provide information about student growth over time. The TLI allows comparison of TAAS student performance from one year to the next to determine whether performance is improving, is being maintained, or is decreasing. Future plans call for incorporating the growth in performance as measured by the TLI into the statewide accountability system for Texas public schools and school districts.

TAAS results reported here reflect those used in the 1994 statewide accountability system. The results used are the percent of students passing tests in the specific areas of reading, writing and mathematics. In the past, evaluation of performance focused on the percent of students passing all tests taken. As an adjustment for mobility, only students enrolled in the district at the end of October are included in the TAAS results for accountability purposes.

These TAAS results were reported in the 1994 data tables for accountability, the 1993–94 Academic Excellence Indicator System (AEIS), and the 1993–94 School Report Cards. In all cases, the results for students receiving special education services have been excluded. Readers wishing to review TAAS results for all students tested, rather than the results adjusted for mobility, should request the TEA publication *Texas Assessment of Academic Skills: Student Performance Results, 1992–1993 and 1993–1994.*

During the spring semester of 1994, over 1.4 million students were tested in grades 3 through 8 and 10. Reading and mathematics tests were given at all these grades; writing was assessed at grades 4, 8, and 10. In addition, science and social studies tests were administered to students in grades 4 and 8. Tests were also administered for end-of-course examinations in Algebra I and Biology I. Results for science, social studies and the end-of-course examinations are not provided in this publication.

While various measures can be used to interpret test results, this document reports the *percent passing;* computed as the number of students passing a test divided by the number of students taking a test. The percent passing *all tests taken* is the number of students passing all the tests they attempted (up to three) divided by the number of students who were tested. The percent

### EXHIBIT 10
### Percent of Students Passing TAAS by Grade and Subject
### Spring 1994

| Grade | # Students Tested | % Passing All Tests Taken | % Passing Math | % Passing Reading | % Passing Writing |
|---|---|---|---|---|---|
| 3rd | 203,232 | 58.6% | 63.0% | 77.9% | n/a |
| 4th | 205,852 | 54.8% | 59.4% | 75.5% | 85.5% |
| 5th | 207,771 | 58.7% | 62.6% | 77.5% | n/a |
| 6th | 214,778 | 56.6% | 61.1% | 74.1% | n/a |
| 7th | 213,360 | 56.5% | 59.7% | 75.9% | n/a |
| 8th | 211,548 | 50.5% | 58.6% | 77.2% | 69.8% |
| 10th | 173,780 | 53.5% | 58.4% | 77.7% | 82.5% |
| All Grades | 1,430,321 | 55.6% | 60.5% | 76.5% | 79.0% |

*The TAAS is a state-administered criterion-referenced test that draws its objectives from the essential elements (the state-mandated curriculum) established by the State Board of Education. In spring of 1994 students in grades 3 through 8 and 10 (exit-level) were tested — an increase over the number of grades tested the previous spring (4, 8 , and 10). Test results reported in this publication are for non-special education students, enrolled in the district as of late October, 1993. These results were used in the 1994 statewide accountability system.*

passing can be shown by individual grade, or the percent passing can be computed using counts of passers and takers summed across all grades tested. This last measure is referred to as the *summed across grades* passing percent and is computed using either grades 4, 8, and 10, or grades 3 through 8 and 10 depending on the application.

*Exhibit 10* shows spring 1994 results by grade and subject. Among the grades tested, the percent passing all tests taken is lowest in grade 8 (50.5 percent) and highest in grade 5 (58.7 percent). Statewide, approximately 56 percent of the students in all grades tested passed all tests taken.

Comparison to prior year results, using comparable data, indicate improvements in performance from 1993 to 1994. In the spring of 1993, 48 percent of the students passed all the tests they took. In the spring of 1994, 53 percent of the students in grades 4, 8, and 10 passed all tests taken, a gain of 5 percentage points.

Further examination of performance summed across grades 4, 8, and 10 indicates that reading performance increased between 1993 and 1994 from 70 percent to 77 percent and mathematics increased from 54 to 59 percent, while writing decreased slightly—from 80 percent to 79 percent. Results by student group and subject indicate that the greatest gains in performance were achieved by economically disadvantaged students in reading (from 51 percent in 1993 to 62 percent in 1994). Hispanic (+11) and African American (+9) students also showed growth in the percent passing reading. In mathematics, the percent passing increased by 7 percentage points for both economically disadvantaged and Hispanic students, and by nearly 6 percentage points for African American students. The percent passing writing showed either minimal gains or losses across the student groups. *See Exhibit 11.*

*Exhibit 12* on page 14, presents 1994 test results for all grades tested (3 through 8 and 10) by subject and student group. As shown in this exhibit, performance on the reading and writing tests is consistently higher across the student groups than performance on the mathematics test.

*Exhibit 12* also shows that significant disparities in performance continue to exist among the major ethnic groups in Texas. Differences in performance between African American and white students range from 22 percentage points in writing to 35 percentage points in mathematics. Similar, but smaller, disparities exist between Hispanic students and white students, where the gap ranges from 18 in

### EXHIBIT 11
### Comparison of 1993 and 1994 Percents of Students Passing TAAS Summed Across Grades 4, 8, and 10

| | | All Students | African American | Hispanic | White | Other | Economically Disadvantaged |
|---|---|---|---|---|---|---|---|
| Reading | Spr. 94 | 76.7% | 60.3% | 64.6% | 87.6% | 83.9% | 62.1% |
| | Spr. 93 | 69.8% | 51.3% | 54.1% | 83.5% | 77.7% | 51.3% |
| Writing | Spr. 94 | 79.0% | 65.8% | 69.6% | 87.6% | 84.8% | 67.7% |
| | Spr. 93 | 79.8% | 68.1% | 69.0% | 89.2% | 84.2% | 67.6% |
| Math | Spr. 94 | 58.9% | 35.7% | 44.6% | 72.1% | 79.0% | 42.6% |
| | Spr. 93 | 53.6% | 30.1% | 37.2% | 68.3% | 75.0% | 35.2% |
| All Tests | Spr. 94 | 52.9% | 30.3% | 37.8% | 66.8% | 70.3% | 35.7% |
| | Spr. 93 | 48.4% | 26.0% | 31.4% | 63.7% | 65.4% | 29.3% |

*The appropriate comparison of spring 1994 to spring 1993 performance is between the same grades tested in both years—grades 4, 8, and 10. To insure comparability, the 1993 results, like the 1994 results, represent the performance of non-special education students, enrolled in the district as of late October of the school year. In these grades, all student groups demonstrated improvement in 1994 with the exception of white and African American students whose performance in writing declined between 1993 and 1994.*

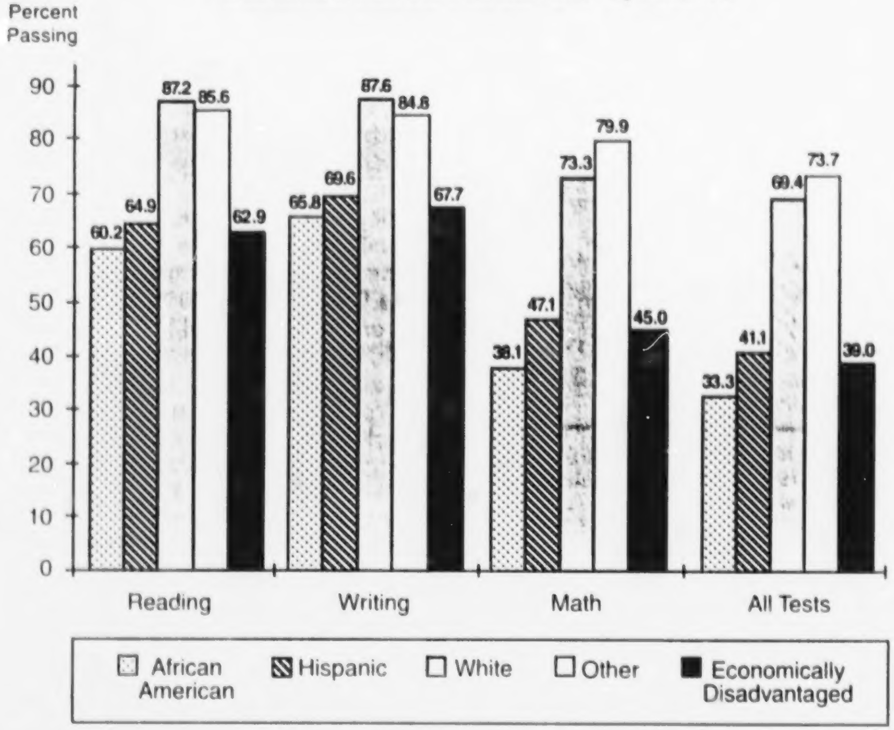
writing to 26 in mathematics. Thirty-three percent of African American students and 41 percent of Hispanic students passed all tests taken compared with 69 percent and 74 percent of white and "other" (Asian/Pacific Islander and Native American) students, respectively. Economically disadvantaged students had passing rates which were 17 percentage points lower than statewide rates and 27 percentage points lower than passing rates of non-economically disadvantaged students. Progress toward reducing these disparities is a major objective of the State Board of Education's *Long-Range Plan for Public Education.*

Districts must offer remediation to students failing to pass a test in a subject area. Statewide, in grades 3 through 8 and 10, over 600,000 students (44 percent) of all non-special education students required remediation after the 1994 TAAS administrations. In grades 4, 8, and 10, approximately 47 percent (278,645) of all non-special education students tested required remediation in one or more subject areas. This figure is lower than the 355,265 students (54 percent) who required remediation due to failing the TAAS tests at grades 4, 8, and 10 in 1993. The state compensatory allotment supports this remediation; however, it is allocated based on counts of economically disadvantaged students, not the number of students requiring services.

Students failing to pass the exit-level test are not eligible to receive a Texas high school diploma. Among sophomores taking the March 1994 TAAS exit test, 80,770 (46 percent) failed one or more of the subject areas. These students will have seven more opportunities to master the exit-level TAAS test before the end of their senior year as the class of 1996. Results for the class of 1994, which began taking the exit test in the fall of 1992 and had six re-test opportunities, indicate that approximately 5,900 students statewide met all other graduation requirements except mastery of the TAAS test. This represents an improvement of 900 students over the class of 1993, which had 6,805 students who did not meet the exit requirement after five re-test opportunities. Texas has no certificates of completion for students who fail to pass the exit-level TAAS.

Group information in the *Detailed Statistics* section shows that the percent of students passing all tests taken on the statewide assessment instrument tends to be higher in major suburban districts and lower in large,

**EXHIBIT 12**
**Percent of Students Passing TAAS by Subject, for Ethnic Group, and Economic Disadvantage Status Summed Across Grades 3–8, and 10**



*Spring 1994 performance on the TAAS varies significantly by ethnic group and economic status. A major focus of Texas educators and of the State Board of Education is the reduction of these disparities, often referred to as the "equity" gap. Gaps are smallest in writing where passing rates are generally higher.*

urban districts, a pattern which has held for the past six years.

## *College Admissions Tests*

In Texas, approximately 64 percent of 1992–93 public high school graduates participated in college admissions testing. Of the 1992–93 graduates, over 96,000 took either the Scholastic Aptitude Test (SAT) of the College Board's Admissions Testing Program or the ACT component of the American College Testing Program, or both tests. Nationwide, approximately 43 percent of all graduates of public and non-public schools took the SAT and 36 percent took the ACT. In Texas, over 49 percent of public high school graduates took the SAT, and about 34 percent took the ACT.

The SAT consists of verbal and mathematics components; the ACT includes tests of reading and science reasoning in addition to English and mathematics. Scores on the verbal and mathematics sections of the SAT range from 200 to 800 and sum to the SAT total score, which ranges from 400 to 1600. Each subject area component of the ACT has a score ranging from 1 to 36; the composite is the average of these four scores. Since October 1989, a revised ACT, the Enhanced ACT Assessment, has been administered.

As shown in *Exhibit 13*, average scores for 1992–93 Texas public school graduates on both the SAT and ACT remained below the national averages but showed improvement relative to the nation. Texas' public school SAT scores improved to 18 points lower than the nation in 1992-93, (884 versus 902), compared with 25 points lower in 1991-92. For the ACT composite, the comparison is 20.1 for Texas to 20.7 for the nation. Despite the 40 percent increase in the number of students taking the ACT Assessment in Texas since 1986, the average score has risen seven-tenths (0.7) of a point over this same period. Although Texas ACT scores remained below the national average, composite scores improved by 0.2 points from the prior year, relative to a 0.1 point increase nationwide.

Students who take the SAT report information on their academic preparedness, parental education, and family income. Students' SAT scores tend to rise with increasing numbers of academic courses completed, higher levels of parental education, and higher levels of family income. *Exhibit 14* on page 16, shows the relationship between years of study in academic subjects and SAT total scores.

Similar relationships exist with ACT test score results. The average ACT composite score for Texas students who took a college preparatory high school program, defined as four years of English and three years each of mathematics, social studies, and natural sciences, is 21.4, which is 3.4 points higher than the average score for students who did not complete such a program.

Lower levels of academic preparedness offer one possible explanation for the lower SAT and ACT test scores of African American and Hispanic students relative to scores of white students. Typically, Texas SAT and ACT results show that African American and Hispanic students complete relatively fewer academic courses compared to white students.

### EXHIBIT 13
### SAT and ACT Scores
### 1992–93 Seniors for Texas and the Nation

| | Texas Public School Graduates | All Texas Graduates | All U.S Graduates |
|---|---|---|---|
| **SAT** | | | |
| Verbal | 412 | 413 | 424 |
| Mathematics | 472 | 472 | 478 |
| Total | 884 | 885 | 902 |
| **ACT** | | | |
| English | 19.6 | 19.7 | 20.3 |
| Mathematics | 19.9 | 19.9 | 20.1 |
| Reading | 20.2 | 20.3 | 21.2 |
| Science Reasoning | 20.2 | 20.2 | 20.8 |
| Composite | 20.1 | 20.1 | 20.7 |

*Approximately 49 percent of Texas public high school seniors took the SAT, compared with 43 percent of seniors nationwide. Thirty-four percent of Texas public school seniors and 36 percent of seniors nationwide took the ACT. Texas' public school SAT scores improved to be 18 points lower than the nation in 1992-93, compared with 25 points lower in 1991-92. Although Texas' ACT scores remained below the national average, composite scores improved by 0.2 points from the prior year relative to a 0.1 point increase nationwide.*

Lower level courses in mathematics and language arts are being eliminated from the Texas curriculum and an increased emphasis is being placed on staff development in the instruction of critical-thinking and decision skills. As Texas public school students are exposed to more rigorous and challenging courses, it is expected that more students will both be academically prepared for college and score higher on college admissions tests.

An additional data element reported from the college admissions testing program is the percentage of 1992-93 graduates scoring at or above the accountability criterion score (1000 on the SAT; 24 on the ACT). Only 17.2 percent of the class of 1993 met or exceeded this standard of excellence.

## *Texas Successful Schools Awards System*

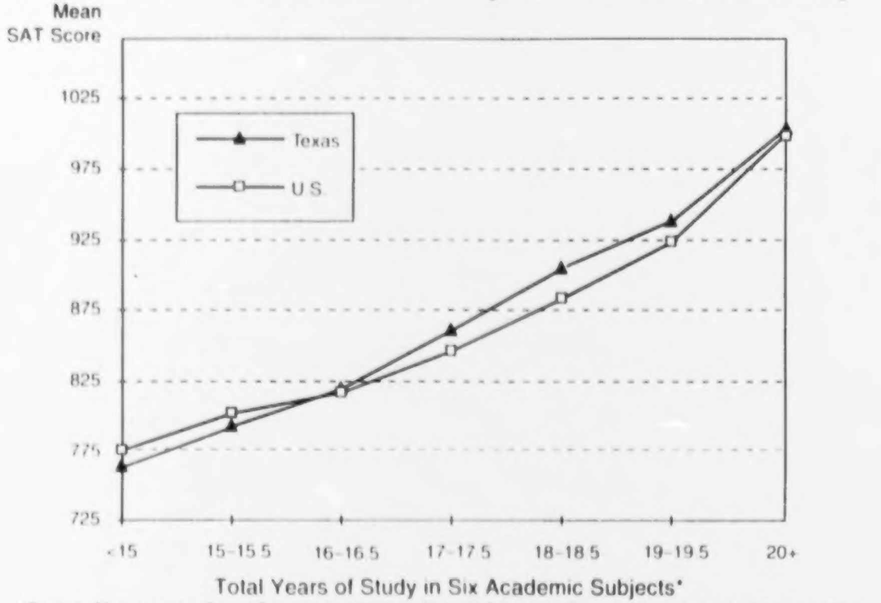
The Texas Successful Schools Awards System (TSSAS) recognizes and rewards schools making the greatest progress toward achieving state educational goals. For 1993–94, the third year of the program, monetary awards totaling $5 million were distributed to 971 schools for excellence and for significant gains in performance. Non-monetary acknowledgment for college admissions testing performance was given to 435 secondary and K–12 schools. Of the 971 monetary award campuses, 100 received an additional TSSAS monetary award for efforts to include students with disabilities into the general education classroom.

In previous years, statute limited monetary awards exclusively to schools showing the highest gains on selected academic indicators. Recent statutory changes continued the Significant Gain award but also permitted monetary awards for high performing schools, which were those with Exemplary and Recognized performance. Criteria for the Exemplary and Recognized Performance awards correspond directly with standards required for Exemplary and Recognized accountability ratings. To be eligible for a Significant Gain award, schools rated acceptable had to meet or exceed criteria recommended by an advisory committee and approved by the commissioner of education. Schools receiving TSSAS monetary awards were eligible to apply for an additional monetary award for efforts to include students with disabilities into the general education classroom. These applications were reviewed by an advisory committee and TEA staff with final approval from the commissioner of education.

The total number of schools receiving cash awards and/or acknowledgment certificates in 1993–94 was 1,312, a slight increase over the 1,289 TSSAS awardees in 1992–93.

**EXHIBIT 14**

**SAT Scores for 1992–93 Seniors by Years of Academic Study**



*English, Mathematics, Social Science and History, Natural Sciences, Foreign Languages, and Arts and Music

*For both Texas and the nation, test scores rise with academic preparedness. Given comparative levels of preparation, Texas' scores equal or slightly exceed the national totals. Since the mean SAT scores for Texas are lower than those of the nation, this implies that students in Texas take fewer years of academic units on average than do SAT examinees nationwide. However, Texas' much improved SAT scores from the prior year also correspond with an increasing number of students completing more academic units relative to the nation.*

# District Staff

## Staff Counts

### Teachers

Teachers comprise the largest single category of staff, accounting for 84 percent of the professional staff and 52 percent of the total staff. *See Exhibit 15.* Although students increased by 1.9 percent over the previous year, teacher FTE counts grew by 3.3 percent. Student growth rates vary across districts and grades, requiring districts to hire additional teachers for less than full classrooms—approximately one new teacher FTE for every 9 new students. In addition, data show that students are taking more courses than they were five years ago.

Rates of teacher increases vary with the size of the district. Districts in all categories hired teachers at a rate greater than the respective average enrollment growth rates, thereby reducing their average student/teacher ratios. The 354 districts with enrollments greater than 1,600 hired new teachers at a rate of between one and two percent higher than the respective enrollment growth rates. In the smaller districts, many new students were likely absorbed into existing classes, thereby reducing the demand for new teachers. Districts with enrollment between 1,000 and 1,600 hired new teachers at the lowest rate—one for every 13.0 new students. *See Exhibit 16* on page 18.

**EXHIBIT 15**
**District Staff by Category**

| Category | FTEs | Percent of Total | Average Salary Base Pay Only | Average Salary (Including Supplements) |
|---|---|---|---|---|
| Teachers | 226,560 | 52.2% | $28,894 | $30,519 |
| Campus Administrators | 10,839 | 2.5% | $46,425 | $46,975 |
| Central Administrators | 4,049 | 0.9% | $55,206 | $55,388 |
| Professional Support | 28,242 | 6.5% | $36,041 | $36,806 |
| TOTAL PROFESSIONALS | 269,690 | 62.1% | $30,743 | $32,220 |
| | | | | |
| Educational Aides | 38,817 | 8.9% | $11,044 | $11,092 |
| Auxiliary Staff | 125,643 | 28.9% | $13,783 | $13,783 |
| TOTAL STAFF | 434,150 | 100.0% | $24,074 | $24,961 |

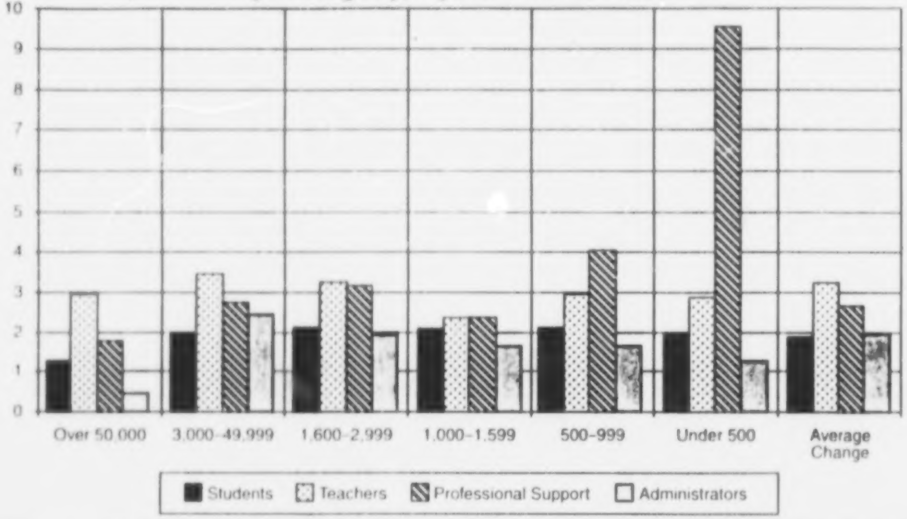
*See **Exhibit E** in the **End Notes** for a list of positions assigned to each of these categories. Supplements are amounts paid in addition to an employee's base salary and include payments for coaching, club sponsorships, and band or orchestra assignments. Supplements also include amounts paid to teachers from the Teacher Compensation Allotment, a source of funds for teachers previously on the career ladder.*

### Support and Administrative Staff

The combined categories of administrators and professional support staff increased by 2.5 percent between 1992–93 and 1993–94, slightly higher than the growth in the student population (1.3 times higher). Unlike previous years, teachers increased by the largest percentage of any staff category (3.3 percent). Professional support staff increased by 2.7 percent overall and campus administrative staff grew at a rate of 2.2 percent. Central administrative staff increased by the smallest margin, 1.5 percent, below the 1.9 percent rate of student growth.

Of interest are the 374 districts with under 500 students and the 118 districts with enrollment between 1,000 and 1,600; campus administrators increased at twice the state average while central administrators decreased by over 2.5 percent in these districts. The dis-

## **EXHIBIT 16**
## One Year Change in Professional Staff Counts by Category, by Size of District



*Changes in teacher and professional support counts exceeded changes in enrollment in all categories. For administrators this only occurs in districts with between 3,000 and 50,000 students.*

tricts with under 500 students also added professional support staff personnel at a rate greater than three times the state average.

### *Non-professional Staff*

The number of educational aides increased by 5.7 percent this year, a decline from last year's 8.9 percent increase. In 1994, aides employed at middle schools and junior high schools increased by at least 11 percent over the previous year, while aides employed by kindergarten through grade 12 schools decreased by over 3 percent. Analysis continues to demonstrate that a portion of these aides will advance to teaching positions. During 1993–94, approximately 1,850 teachers (less than one percent of the total teaching staff) had been employed as aides sometime between 1990 and 1993.

Auxiliary staff, the second largest category of staff at 28.9 percent of the total, increased by 3.5 percent. Auxiliary staff includes secretaries, bus drivers, maintenance workers, and cafeteria workers.

The ethnic composition of district staff changed only slightly from the previous school year. Minority staff increased by one-half percent of all staff employed in Texas public schools. This is disaggregated to 22.7 percent Hispanic, 11 percent African American, and 0.6 percent Asian/Pacific Islander and Native American. Among teachers, approximately 23.1 percent are minorities, representing no significant change from the previous academic year.

Although slight increases were observed in minority percents, Texas must continue to intensify ethnic minority recruitment into education careers. In 1992–93, only 23.1 percent of the candidates seeking initial certification in Texas were African American, Hispanic, Asian/Pacific Islander and Native American. Only 12.6 percent of the teachers entering Texas from other states in 1992–93 belonged to one of these ethnic groups. In contrast, the 1992–93 alternative certification program interns were 49.4 percent minority and the former educational aides now in teaching positions were 38.6 percent minority. These routes to certification continue to be the most successful at ethnic minority recruitment.

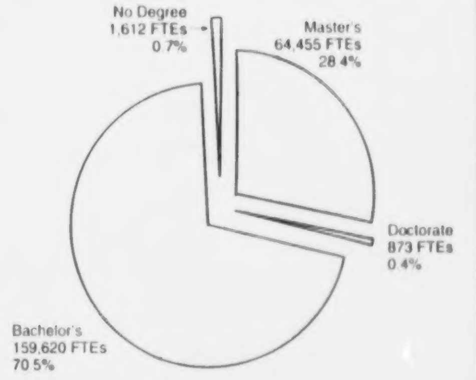
### *Teacher Experience*

Teachers employed in Texas in 1993–94 averaged 11.5 years of total teaching experience. Nearly 45 percent of all teachers have between 1 and 10 years of experience and 17 percent have more than 20 years experience. In 1993–94, new teachers accounted for 6.4 percent of the total. Teachers at secondary schools continue to be more experienced, 13.9 years on average, as compared with elementary school teachers with an average of 11.4 years of experience. Districts with greater enrollment growth have less experienced teachers, indicating new, rather than experienced, teachers are more often hired to meet the increase in demand.

## *Teacher Credentials*

To teach in public schools in Texas, individuals must earn appropriate certification by satisfying a combination of education, experience, and test requirements that vary depending upon the certification route pursued.

**EXHIBIT 17**
**Highest Degree Held for Teachers**



*The percent of Texas teachers with advanced degrees continues to decline. In 1993–94, 28.8 percent of teachers have Master's or Doctorate degrees, a 0.6 percent decline from the prior year.*

### *Education*

As shown in *Exhibit 17*, the majority of teachers in Texas (70.5 percent) hold a bachelor's degree. An additional 28.8 percent have earned master's or doctoral degrees. The less than one percent of teachers reported as having no degree are composed of certain career and technology education teachers who are certified by meeting other experience and education requirements, or other teachers who have professional licenses for which degree information is not required by the agency.

Larger districts continue to enjoy a larger proportion of teachers with advanced degrees. Thirty-five percent of the teachers in the seven largest districts have master's degrees or higher, compared with 21 percent of teachers in the smallest districts. The percentage of Texas teachers with advanced degrees continues its gradual decline; the decline for 1993–94 was 0.6 percent which is less than the historical trend of one-percent per year since 1988–89. Rural districts are losing proportionately more advanced degreed teachers than urban districts over the same time period.

### *Certification*

To become certified in Texas, an educator must pass appropriate Examination for the Certification of Educators in Texas (ExCET) tests. The ExCET program in 1993–94 consisted of 53 content specialization tests (e.g., Elementary Comprehensive, Biology, General Special Education), two professional development (i.e., pedagogy) tests, and seven examinations for a professional certificate (e.g., Superintendent, Mid-management Administrator, Counselor). In general, ExCET examinees take a combination of tests—the appropriate professional development test and one or more content specialization tests in the fields in which they are seeking certification.

Prior to taking the ExCET, students seeking to enter an approved teacher preparation program in a Texas public college or university must pass the Texas Academic Skills Program (TASP) Test, which assesses basic skills in reading, writing, and mathematics.

The largest group of ExCET examinees is recent university graduates. However, out-of-state teachers, alternative certification candidates, and already-certified individuals seeking certification in additional areas, also take the ExCET.

Overall, between September, 1993 and August, 1994, 38,214 examinees took ExCET tests. Of the 21,081 people who took an ExCET test for initial certification, 64 percent were beginning teachers from a teacher education program in a university, 14 percent were from an alternative certification program, and 23 percent were from another state. The success rate for all ExCET tests attempted for the first time (66,009 tests taken) was 84.4 percent. Already-certified educators have the option of seeking additional certification by taking other ExCET tests, either with or without additional university-based preparation. In some cases, an internship is also required. *See Exhibit 18* on page 20, for the 1993–94 ExCET passing rates by certification route.

## EXHIBIT 18
## 1993–94 ExCET Passing Rates by Certification Route

| | Number Tested | Percentage of Tests Passed |
|---|---|---|
| *Seeking Initial Certification* | | |
| University Program | 13,402 | 86.4% |
| Alternative Certification | 2,873 | 85.8% |
| Certified Out-of-State | 4,806 | 89.7% |
| TOTAL | 21,081 | 87.0% |
| *Seeking Additional* or Professional Certification* | | |
| Certification-by-Examination | 11,986 | 76.1% |
| University Program | 1,225 | 86.3% |
| Professional Certification | 3,598 | 88.4% |

*Some examinees seeking additional certification may appear in more than one route.

*A number of Texas teachers sought additional certification under a law which allows those who pass the ExCET to forego formal preparation (for some, an internship is also required). The areas in which most examinees seek certification-by-examination are English as a second language, elementary education, generic special education, and early childhood education. Examples of ExCET tests for professional certification are Superintendent, Mid-management Administrator, and Counselor.*

General information on ExCET performance is available from the Texas Education Agency Division of Educator Assessment and Appraisal.

Alternative certification is a process offered in Texas through which degreed graduates in disciplines other than education can become certified teachers. These candidates must pass a basic skills examination to enter the program, successfully complete a one-year internship, and then pass the appropriate ExCET examinations to obtain certification.

By law, persons in alternative certification programs in the past had not been required to take a professional development test; however, the law was changed to require persons entering an alternative certification program in 1993–94 and later to pass such a test. Since its inception in 1985–86, the number of school districts participating in alternative certification programs has grown from 1 to 446.

Teachers certified in Texas before 1986 must revalidate their certification for employment in Texas public schools by passing either the Texas Examination of Current Administrators and Teachers (TECAT) or any ExCET examination. Approximately 1,500 individuals took the TECAT, a test of minimum skills in reading and writing, during the last year.

### *Permits*

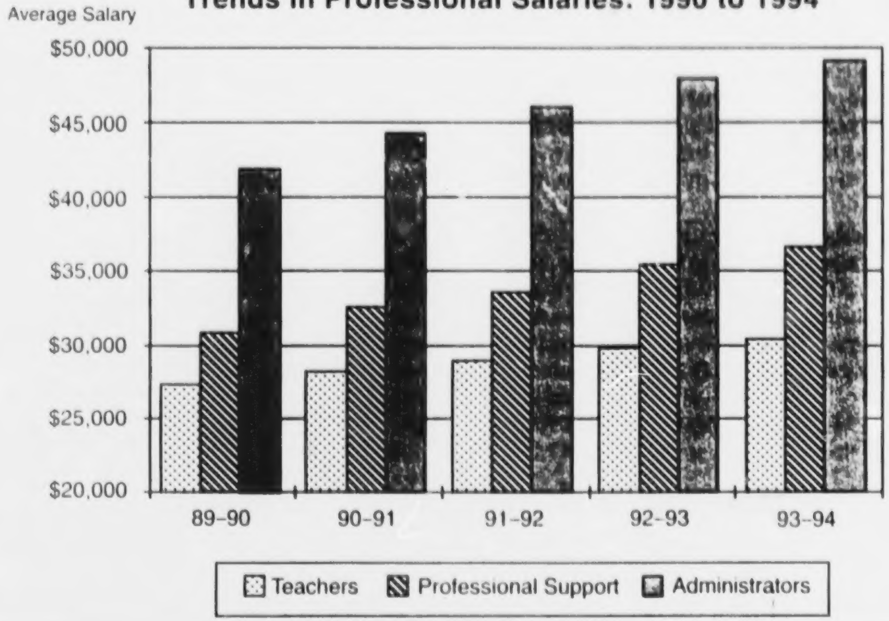
Teachers, counselors, principals, and certain administrators who have not yet earned the appropriate certification may be granted one of five types of permits in order to perform their assigned duties. A permit must be acquired for a non-certified person to teach, for a teacher to undertake counseling or administrative duties, or for a teacher to teach more than one class out-of-field.

An ESC must authorize the nonrenewable permit, emergency teaching permit (ETP), special assignment permit (SAP), and career and technology permit. A district superintendent may authorize the temporary classroom assignment permit (TCAP) for a teacher to teach more than one class out-of-field at the secondary level.

A nonrenewable permit is issued to allow an individual to complete testing requirements stipulated for continued employment. An ETP is activated by the employing superintendent for the services of an individual who is not certified at all or not certified at the level of the classroom teaching assignment. An SAP is activated by the employing superintendent for an individual who is not certified for assignment to a professional service, special education, bilingual education, English as a second language, or kindergarten position.

Statewide, 3.3 percent of teachers hold an active permit of some type. The percentage of teachers holding permits varies by subject area and student population served. Excluding areas within regular education, the two areas with the greatest proportion of teachers holding emergency teaching permits are bilingual education and special education. For the past four years, the U.S. Department of Education has designated these as teacher shortage areas in Texas, making teachers in these areas eligible for loan deferments or a reduction of teaching obligation under federal loan and scholarship programs.

**EXHIBIT 19**
**Trends in Professional Salaries: 1990 to 1994**



*Between 1989–90 and 1993–94 the average teacher salary in Texas rose 11 percent, to $30,519. Administrative salaries have risen 17 percent and professional support, 19 percent, over the same time period. All salaries in this exhibit include supplement amounts for all years shown.*

## *Professional Salaries*

In 1993–94, professional base salaries grew by 1.7 percent, to $30,743, from the 1992–93 school year. Total salaries, including reported supplements, climbed to $32,220, a 2.1 percent increase. Supplements are amounts paid in addition to the base salary contracted for an employee's regular duties. Supplements are paid for such things as coaching, club sponsorships, and band or orchestra assignments. Supplements also include money available from the Teacher Compensation Allotment, a source of funds which helps sustain supplements paid to teachers previously on the career ladder.

Professional support staff salaries exhibited the greatest percent increase, approximately 3.2 percent, followed by campus administration with a 2.5 percent increase. On average, central administrators earn $55,388, campus administrators $46,975, and professional support staff $36,806. Teacher salaries, including supplements, increased by 2.0 percent, to $30,519. *Exhibit 19* depicts trends in professional salaries since 1989–90.

According to the 1994 *Digest of Education Statistics*, Texas teacher salaries ranked 34th among the states in 1993–94. The average salary for Texas teachers was 15.2 percent below the national average of $35,958. However, how much teachers earn is closely linked to their years of teaching experience. For example, in Texas the minimum amount teachers can be paid is controlled by a state mandated salary schedule which requires that minimum salaries rise as the years of experience of the teacher increase. Because the average experience level of teachers varies from state to state, average salaries are likely to be higher in states with more experienced teachers.

In addition to differences in teacher experience among states, cost-of-living differences explain some of the national variation. According to the American Federation of Teachers, in 1992–93, Texas ranked 29th in teacher salaries. However, when cost-of-living was considered, Texas moved to the 22nd rank.

Although Texas salaries are low compared with other states, according to the *1994 Digest of Education Statistics*, Texas teachers enjoy a pupil-teacher ratio that is lower than the national average—15.7 in Texas compared with 17.4 nationally in 1992–93. The expense of maintaining smaller class sizes can limit the ability of districts to compensate teachers with higher salaries. Of the 33 states with salaries higher than those in Texas, 21 also had higher pupil-teacher ratios in 1992–93.

New teachers earn about the same starting pay regardless of campus type, but as the years of experience increase, high school teachers earn more than their middle and elementary school colleagues. This is likely due to increased opportunities for salary supplements related to cocurricular and extracurricular activities at the higher grades.

Analysis of salary increases by size and type of district indicates the greatest increases did not occur in large, urban districts as they have in prior years. The greatest growth took place in districts classified as independent towns, in districts suburban to major urban areas, and in districts in other large, though not major metropolitan, cities.

Growth of teacher base salaries in the seven largest districts increased only 0.9 percent on average this year compared with 4.7 percent a year ago. The smallest districts in the state, those with fewer than 500 students enrolled, exhibited increases in teacher base salaries of 1.6 percent, compared with two percent in 1993. Between 1990 and 1993, the difference between what the major urban districts paid and what rural districts paid had been steadily increasing. For teacher salaries, urban districts paid 11 percent more in 1989–90, but over 17 percent more in 1992–93. This year the margin of urban teacher salaries over rural salaries was slightly less than 17 percent because rural salaries grew at a greater rate than urban salaries.

A career ladder for teachers, mandated by the legislature in 1984, was first implemented in the 1984–85 school year. The system was initiated to reward excellence in the teaching field and to attract talented students to the teaching profession by raising teacher compensation. Senate Bill 7, passed during the 73rd session of the Texas legislature, abolished the career ladder effective with the 1993–94 school year. In its place is a teacher compensation allotment of $90 for each student in average daily attendance, which is used as a replacement for the supplement to pay the salaries of teachers who were previously entitled to career ladder supplements.

In 1993–94 districts reported payroll amounts of $277 million in teacher compensation allotments for approximately 122,000 teachers. This results in an average of nearly $2,280 for each teacher receiving this type of supplement.

# Finances

1993-94 funding for public education in Texas comes from three major sources: local, state, and federal. Local funding is derived from taxes on district property wealth. State funding is based on legislative appropriations determined through a finance system defined in statute. Federal funds are appropriated by Congress, generally for specific purposes.

## State Funds

State funds for public education in Texas are distributed through a system of formulas known as the Foundation School Program (FSP). In response to the *Edgewood v. Kirby* litigation, the FSP has undergone significant revision. Senate Bill 1019 was passed in 1989 to address *Edgewood*. Later that year, the Texas Supreme Court declared the system of financing public schools to be unconstitutional. The legislature again made changes to the system with Senate Bill 1, passed in 1990. However, the post-Senate Bill 1 system was also found to be unconstitutional, and in 1991 the legislature passed Senate Bill 351. Senate Bill 351 differed from previous FSP law by creating an additional funding source for each school district, the county education district (CED). Under this legislation, funds from taxable property were generated by two entities: the local school district and the CED.

In January 1992 the court found Senate Bill 351 to be unconstitutional, primarily because the CED taxes were deemed to be illegal. The court allowed the CED taxes to be collected during 1992-93, however, and the Legislature was directed to implement a new finance plan by June 1993.

A new bill, Senate Bill 7, was passed in May 1993 following a series of other failed attempts to alter school funding mechanisms. These failed attempts included a method of funding known as the "Fair Share Plan" proposed during a November 1992 special session, as well as three proposed constitutional amendments voters rejected in May 1993.

Senate Bill 7 went into effect beginning with the 1993-94 school year at the same time its constitutionality was being challenged. In December 1993, District Judge Scott McCown upheld its constitutionality but his ruling was appealed directly to the Texas Supreme Court. On January 30, 1995, the Texas Supreme Court upheld Judge McCown's ruling, declaring the system under Senate Bill 7 to be constitutional.

### Equalizing Wealth

Changes between Senate Bill 7 and Senate Bill 351 were significant. With Senate Bill 7, CEDs were dissolved and a new chapter was added to the Education Code which provides a different mechanism for equalizing property wealth. This new chapter, Chapter 36, establishes an equalized wealth level of $280,000 per weighted pupil and requires districts above this level to reduce their wealth by choosing one of five options. If no option is exercised, the commissioner of education is directed to detach property and/or consolidate districts in order to achieve the equalized wealth level. The five options are:

1) *Voluntary Consolidation*, the boards of trustees of two or more districts agree to consolidate. The resulting consolidated district must have wealth per student less than the equalized wealth cap of $280,000 per pupil. No districts elected this option in 1993-94.
2) *Voluntary Detachment and Annexation of Property*, the boards of trustees of two districts agree to detach property from one district and annex it to the other. The resulting wealth of both districts must not exceed certain levels.
3) *Purchase of Attendance Credits from the State*, a district purchases attendance credits in order to reduce its wealth per pupil to the equalized wealth level. Each credit corresponds to one student in weighted average daily attendance (ADA) which is added to the district's own weighted ADA total for the purpose of calculating wealth per student. The cost of a credit is the greater of either the district's total tax revenue per weighted ADA or the state average total tax revenue per weighted ADA for the preceding school year. Money from the payment of credits is deposited for use in financing the FSP. In 1993-94, 64 districts chose this option.
4) *Education of Students in Other Districts*, a district agrees to pay to educate students of another district. The students

are counted toward the paying district's property wealth. The cost of educating each additional student is equal to the cost of attendance credits described in option 3. Thirty districts chose this option in 1993–94.

5) *Tax Base Consolidation*, the boards of trustees of two or more districts agree to conduct an election to create a consolidated taxing district. This type of tax base consolidation differs from CEDs in that all M&O taxing authority resides in the taxing district. Component districts have no M&O taxing authority. No districts chose this option in 1993–94.

Four districts elected to both purchase attendance credits and educate students in other districts, bringing to 98 the total number of districts participating in one or more of these wealth-reducing options. During 1993–94 all districts exercised their options in a timely manner, thus avoiding mandatory detachment or consolidation by the commissioner.

Senate Bill 7 maintained the two-tiered system of formulas initiated with Senate Bill 1019 in 1989. Under Senate Bill 7, as in prior legislation, the distribution of state aid to school districts is governed by three basic components: the Available School Fund (ASF); tier 1 state aid; and, the guaranteed yield program (tier 2).

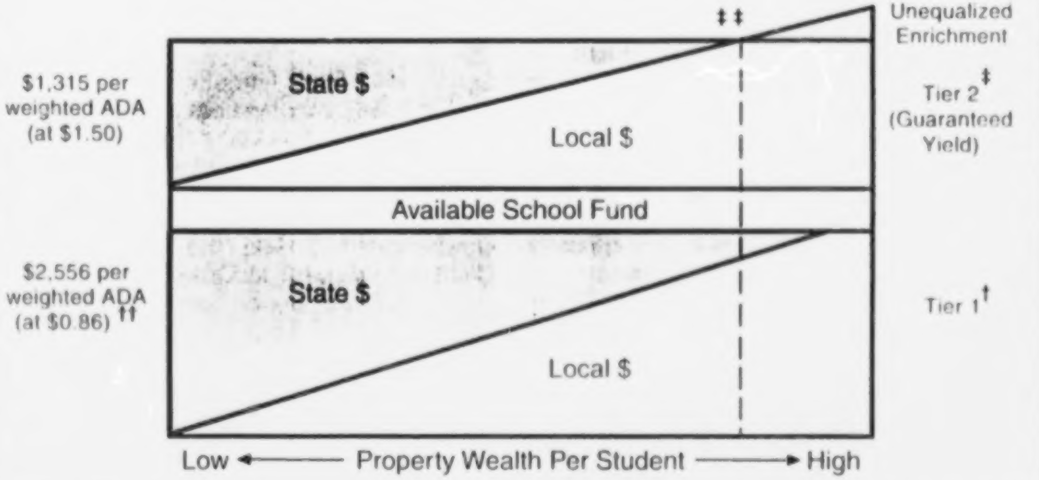
### *Available School Fund*

Constitutionally created in 1876, the ASF consists primarily of earnings from the Permanent School Fund and taxes dedicated to the fund by the state constitution. Most of the ASF revenue is distributed to local school districts on a per capita basis. In 1993–94, the per capita apportionment for school districts was $334 per ADA. *See Exhibit 20.*

### *Tier 1*

The first tier of the FSP is a financing system made up of a series of allotments designed to ensure that each school district can provide instructional programs suitable to meet the basic educational needs of its students. Allotments are calculated using various student counts. These include the student count called average daily attendance (ADA), student head counts based on identified characteristics such

**Exhibit 20**
**Foundation School Program**
**Including Basic Allotment and Guaranteed Yield**



‡‡
Unequalized Enrichment
$1,315 per weighted ADA (at $1.50)
State $
Local $
Tier 2‡ (Guaranteed Yield)
Available School Fund
$2,556 per weighted ADA (at $0.86) ††
State $
Tier 1†
Local $
Low ← Property Wealth Per Student → High

† *In tier 1, local funds are generated by the districts which tax property within their boundaries at a rate of $0.86 per $100 of valuation.*

†† *To provide equity, the state provides additional funds to districts with low wealth to maintain an average funding level of $2,556 per weighted ADA.*

‡ *Tier 2 provides additional, or enrichment funds, generated when districts tax property above the tier 1 rate.*

‡‡ *In districts with wealth in excess of $205,500 per weighted pupil, a penny of tax effort generates more than $20.55 per pupil, resulting in unequalized enrichment.*

as family income, and full-time equivalent (FTE) student counts, which are counts that have been modified by program or instructional arrangement weights. In the 1993–94 school year, Senate Bill 7 reduced the basic allotment, or the basic amount of money provided from the state, from the $2,400 established by Senate Bill 351 to $2,300 for each student in ADA.

Tier 1 of the FSP computes a cost of providing education services for each district. A fundamental tenet of the financing system is that the state and the school districts will share the cost of this tier of the FSP. The share for each depends primarily on the property tax base of the school district. In 1993–94 districts wishing to participate in the FSP were required to levy a property tax of $0.86, an increase of $.04 over the 1992–93 mandatory rate the CEDs were required to levy under Senate Bill 351.

### *Tier 2*

The FSP revised by Senate Bill 7 retained the guaranteed yield program begun in 1989–90 to provide additional funds to enrich the basic tier 1 program. This level of financing, often called the second tier, enables districts below $205,500 in wealth per student to earn additional state aid by setting their tax rate above the minimum level needed for the first tier of the FSP.

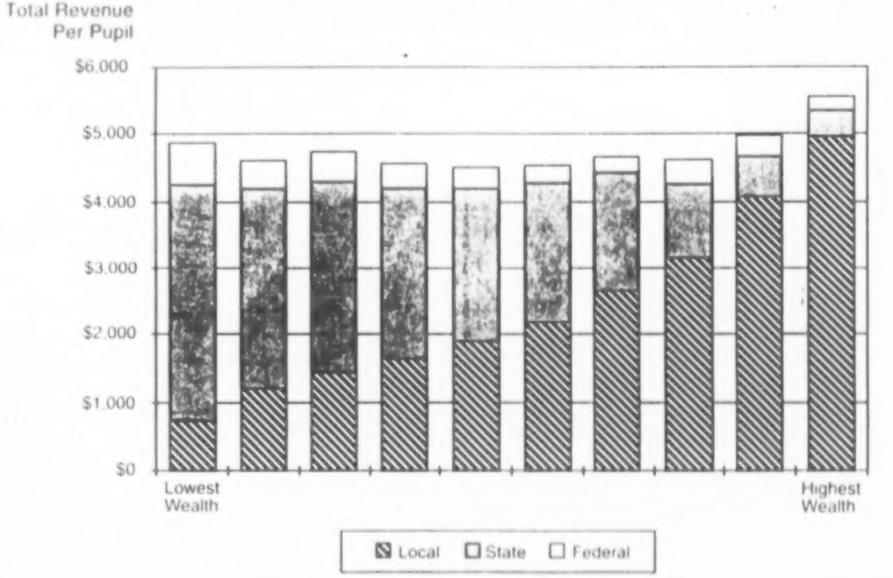
For each penny of tax effort the district levies above the first tier requirement, up to an additional $0.64, the state will guarantee a yield of $20.55 per penny, per weighted student. The maximum guaranteed yield amount for 1993–94 is $1,315 per weighted student. However, maximum state aid may be different for different districts. Senate Bill 7 recognizes the tax effort demonstrated in the year prior to a state fiscal biennium for funding the guaranteed yield. Due to this lag in recognition of the tax effort, some districts were not able to achieve maximum state aid in 1993–94.

*Exhibit 20* illustrates the relationship between district wealth and state funding for both the basic allotment and guaranteed yield tiers of the FSP. In both tiers, poorer districts receive a larger percentage of their revenue from the state while wealthier districts fund their operations with a greater percentage of local funds.

Like *Exhibit 20, Exhibit 21* shows the inverse relationship between wealth and state aid. It also highlights the fact that the local effort of

**EXHIBIT 21**

**Average Revenue Per Pupil by Source, by Wealth Decile**



*The FSP is designed to deliver proportionately more funds to those districts less able to generate local funds. Approximately 10 percent of the districts in the state are represented by each bar on this graph. Average revenue per pupil for the wealthiest districts is $5,644. The variation in revenue for the remaining nine bars (90 percent of districts) is less than $500 per pupil.*

the wealthiest group of districts generates as much revenue as the combined state, local, and federal amounts of the poorer groups. However, in the remaining 90 percent of districts total revenue per pupil does not vary substantially due to wealth because of the FSP structure.

## *Local Funds*

Local funds for public education are raised primarily through the local property tax. Taxes are levied against locally assessed property rolls to generate revenue. All tax rates shown in this publication are effective tax rates, calculated using the market value of property estimates from the Comptroller's Property Tax Division (CPTD). Locally adopted rates, the rates most familiar to taxpayers, are not used for inter-district comparisons because they do not control for variation in local appraisal practices.

Districts set two tax rates each year, one for maintenance and operations (M&O) and another for servicing debt, called the interest and sinking fund rate (I&S). Tax rates are generally subject to a statutory maximum of $1.50 per $100 assessed valuation. Districts may call elections to increase the $1.50 limit by local voter authorization to no more than $2.00.

A district is allowed to set a tax rate each year that will generate the same amount of total revenue per weighted student as was generated the prior year. That rate, plus $0.06, becomes the district's rollback tax rate. If a district sets a tax rate above the rollback rate, an election is automatically triggered and the voters decide on whether to limit the adopted rate to the rollback rate.

Districts continue to exhibit increases in local tax effort. The total average effective tax rate has risen from $0.78 per $100 valuation in 1987–88 to $1.38 in 1993–94, a 77 percent increase in six years. *See Exhibit 22.* The total average effective rate this year is eight cents greater than the year before, which was 14 cents greater than the 1991–92 rate. Almost all the districts in the state (94 percent) now have total effective rates over $1.00, compared with 192 districts (18 percent) with rates at this level six years ago.

Statewide taxable property values in 1993–94 totaled $627.7 billion, about $6.6 billion (or 1.1 percent) more than the previous year. This represents the first year in eight years

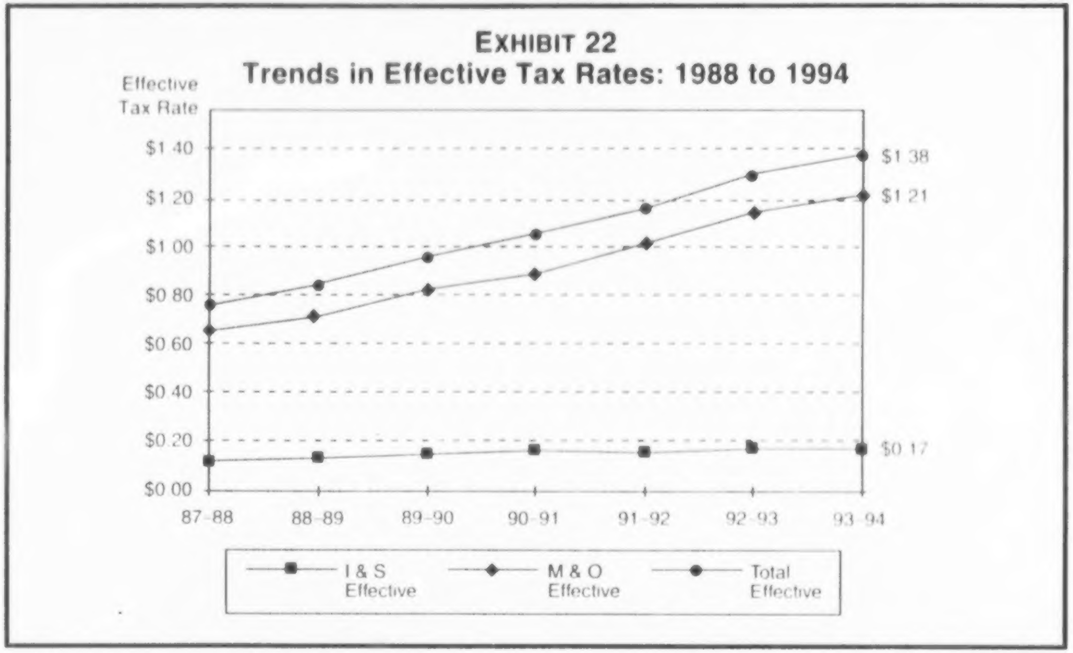


**EXHIBIT 22**
**Trends in Effective Tax Rates: 1988 to 1994**

*School district tax rates continue to increase, driven by a growing student population, and in recent years, by legislative incentives for districts to raise their tax effort to receive state equalizing funds. The M&O rate depicted in 1991-92 and 1992-93 is composed of the local M&O rate plus the minimum required CED rate.*

that property values have increased statewide. During the previous seven years, property values had declined by 0.2 percent to 3.9 percent per year.

Given increasing property values, districts can tax at the same rate and generate greater levy amounts than in prior years. However, districts in Texas increased their local tax effort more than six percent in spite of the slight rise in property values. Likely factors contributing to increases in local effort are the increase in the minimum required tax rate for tier 1 of the FSP (from $0.82 to $0.86), and growing enrollments which require higher taxes in order to generate the same levy amounts per pupil.

## *Federal Funds*

Almost all federal funds are appropriated by Congress for specific programs or specific populations of students, and must be expended for designated purposes. The majority of these federal funds must be spent to supplement programs already in place, not to relieve the state of its financial obligation to provide programs that address the needs of special students. Often, the federal appropriations permit local and state use of each state's allocation. The portion of the state's allocation to be spent by local school districts is distributed on a formula basis. The remaining allocation is discretionary and may be spent at either the state or local level.

Examples of federal sources of funding to school districts are the National School Lunch

### EXHIBIT 23
### 1993–94 Receipts and Disbursements by Source

| Originating Source | Receipts | Pct. of Total | Disbursements | Pct. of Total | Spending Agents |
|---|---|---|---|---|---|
| Local | $9,201,580,641 | 43.2% | $18,103,632,808 | 89.6% | Local |
| State | $8,609,454,308 | 40.5% | $1,156,735,209 | 5.7% | State |
| Federal | $1,632,264,344 | 7.7% | $68,405,619 | 0.3% | Federal |

*The sources of the data shown are TEA accounting records and financial data reported to the TEA by all school districts. Revenues and expenditures in this exhibit do not match revenue and expenditure items in the **District Detail** for two reasons: 1) the **Detail** reports budgeted information while this exhibit shows estimated actual amounts, and 2) the **Detail** shows revenue and expenditures of only one entity involved in public education spending: local school districts. In this exhibit, state revenues include an estimated $318 million in local revenues redistributed by the state.*

Program, various special education funds, and the Improving America's Schools Act Title I program for low-income students.

## Accounting for the System

Texas public school districts use a uniform accounting system to record revenues and expenditures. Other entities, such as regional education service centers and county, state, and federal governments also receive and spend funds on behalf of public education in Texas. School district revenues, in combination with the revenues of these other entities, are referred to as total receipts. All expenditures made by local school districts, plus the additional expenditures made by all other entities for public education are referred to as total disbursements.

## Receipts

The major sources of revenue for public education are the state FSP and the tax revenue generated at the local level by districts. *Exhibit 23* on page 27, shows all receipts and disbursements on behalf of public education by source. Receipts equal total revenue from all sources plus other resources; disbursements equal total expenditures by all spending entities plus other uses. Other resources and other uses are related to local debt obligations.

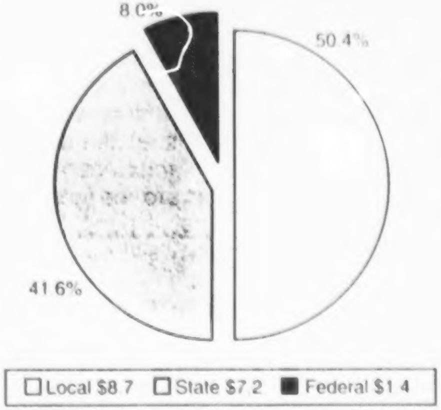
Local revenue, $9.2 billion, represents only those funds received directly by school districts. State revenue, $8.6 billion, includes FSP funding and other items such as textbook purchases and state-matching contributions to the Teacher Retirement System. Beginning with 1993–94, state revenue also includes approximately $318 million in revenues collected from districts exercising one of the wealth equalizing options. These local tax dollars are redistributed as state aid under the FSP. Additional revenue sources shown in the exhibit include federal funds and county and service center contributions. Other resources are the local issuance of debt and income from the sale of assets. Overall, total receipts in 1993–94 increased to $21.3 billion, 7.8 percent more than they were in 1992–93.

## District Revenues

Total revenue from all sources (local, state, federal, and other) totaled $19.5 billion in 1993–94. Of this, $17.3 billion was budgeted by local school districts, representing an increase of 3.1 percent over 1992–93 budgeted amounts. The difference between district budgeted revenues and total revenue from all sources is $2.2 billion. A portion of this difference can be attributed to revenues for items such as textbook purchases and state-matching contributions to the Teacher Retirement System which are not budgeted by local districts. The most significant portion of the difference, however, is due to the fact that districts historically under-budget the revenues they actually receive.

*Exhibit 24* shows district budgeted revenues by source. Local funds comprise 50.4 percent of total revenues in 1993–94, a decrease from the 52.3 percent attributable to local funds in 1992–93. The vast majority of these local funds, 92 percent, are from local property taxes. Overall, the amount budgeted as local revenue decreased 0.7 percent relative to 1992–93, while state revenues increased by 6.0 percent. A significant portion of the increase in state revenues and the corresponding decline in local revenues can be attributed to the $318 million in local tax revenue redistributed by the state.

**EXHIBIT 24**
**Revenue by Source**
In Billions



*Districts budgeted $17.3 billion in total revenues in 1993-94, an increase of 3.1 percent over 1992–93. The vast majority of local funds, over 92 percent, are from local property taxes. This distribution is affected by the inclusion of debt service funds, which are almost entirely generated from local sources.*

Federal revenues increased by 13.8 percent. Furthermore, federal revenues as a percentage of the total increased from 7.2 in 1992–93 to 8.0 percent this year. In any district, the composition and level of revenue sources may vary substantially from the state average depending upon local wealth and qualifications for federal assistance.

In the latter half of the 1980s, the local portion of total revenues rose significantly. In 1984–85 the local portion was 48 percent; by 1989–90 it had grown to nearly 53 percent. Conversely, the state portion had steadily decreased from a high of 46 percent in 1984–85 to a low of 40 percent in 1989–90. In 1990–91 the percent of revenue from state funds increased to 41.4 percent due to an additional $500 million injected into the system as a result of Senate Bill 1. The percent of revenue from state funds fell slightly in 1992 and 1993; to 40.5 percent both years. This year the state share increased to 41.6 percent due to the redistribution of revenues for equalization under Senate Bill 7.

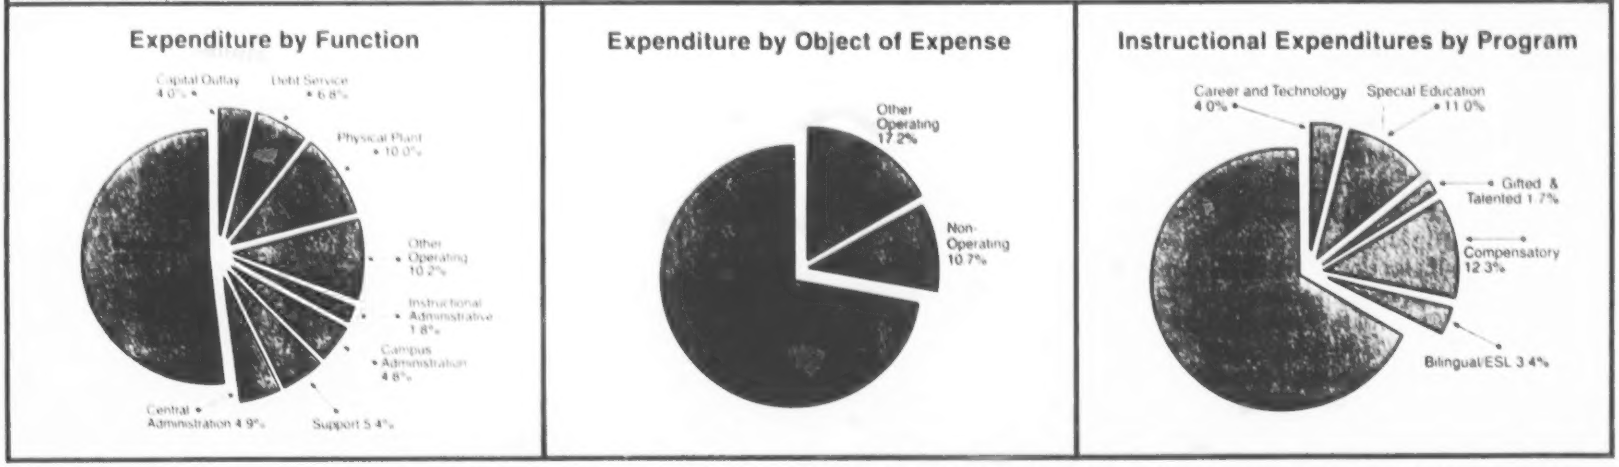
## Disbursements

As *Exhibit 23* on page 27, shows, 90 percent of the disbursements for public school education are made by local school districts. The remaining 10 percent are expended directly from other governmental entities such as state, county and federal governments, and ESCs. Examples of state disbursements include expenditures for textbooks, state-administered schools, the Teacher Retirement System, and the TEA.

## District Expenditures

Expenditures are recorded by fund, function, object, and in some cases, by program. Functions describe the broad purposes of expenditures, such as instruction or administration. Object classifications describe the service or item purchased, for example payroll or supplies and materials. Program classifications are used to identify instructional areas and/or arrangements, such as the regular, special, career and technology, and bilingual education programs. *Exhibit 25* shows the dis-

**EXHIBIT 25**
**Expenditure Analysis**



**Expenditure by Function**

**Expenditure by Object of Expense**

**Instructional Expenditures by Program**

*Expenditures by function and object depict total expenditures budgeted for 1993–94. The third pie chart, instructional expenditures by program, is a more detailed analysis of the "instructional" function portion (52.1 percent) of the first pie chart.*

tribution of various expenditure categories by function, object, and program.

In 1993–94, local school district budgeted expenditures totaled $17.6 billion, an increase of 4.5 percent over 1992–93. This amounts to $4,898 per pupil, compared with $4,774 in 1992–93.

- ***Expenditures by Function***
  Expenditures for instruction accounted for over half (52.1 percent) of all budgeted funds. These costs include all activities dealing directly with the instruction of pupils, including teacher and educational aide salaries, instruction through the use of computers, and classroom equipment purchases.

  Other major expenditures by function are for support services which include administration, 11.5 percent; plant services, 10.0 percent; and libraries and pupil services, 5.4 percent.

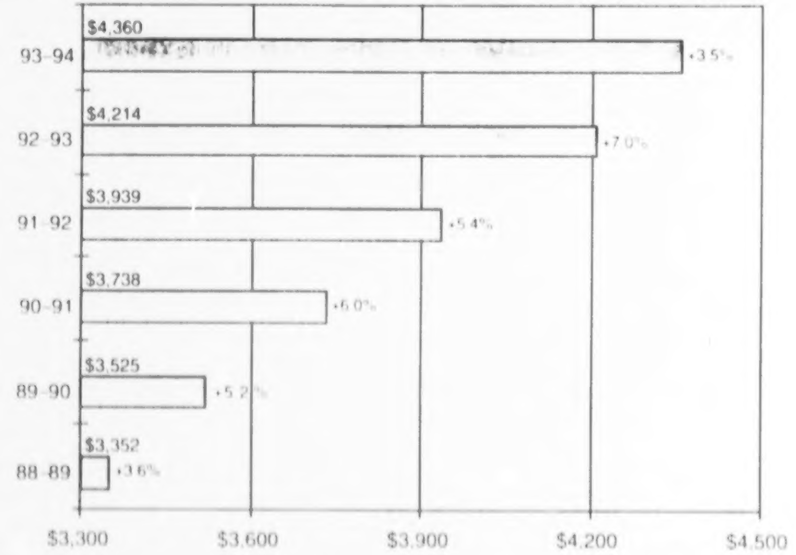
- ***Expenditures by Program***
  Instructional expenditures are categorized by program. In 1993–94, $9.2 billion was budgeted for instructional expenditures. The majority of these funds, 67.8 percent, is spent on the regular program. The remainder is spent for compensatory education, 12.3 percent; special education, 11.0 percent; career and technology education, 4.0 percent; bilingual education / English as a second language programs, 3.4 percent; and gifted and talented education, 1.7 percent.

- ***Expenditures by Object***
  School district object expenditures are divided into current operating and non-operating categories. Current operating expenditures are all salaries, services and supplies. Non-operating expenditures include the construction or remodeling of facilities, and the repayment of debt.

Payroll represents 72.2 percent of all school district expenditures. Expenditures under "other operating" which include purchased and contracted services, and supplies and materials, account for an additional 17.2 percent of the budget. Debt service and capital outlay, both non-operating categories, make up the remaining 10.7 percent.

*Exhibit 26* depicts the increases in per pupil operating expenditures that have occurred since 1988–89. Payroll accounts for 80.8 percent of current operating expenditures and includes salaries, wages, and employee benefits for school district employees.

## EXHIBIT 26
## Trends in Operating Expenditures per Pupil: 1989 to 1994



*Budgeted operating expenditures per pupil have increased 30.1 percent since 1988–89. Percentages shown represent year-to-year changes.*

## Exclusion of Funds

Some funds have been excluded from the figures presented in this document to allow for greater comparability among districts. These funds are associated with districts involved in cooperatives and capital projects.

## Cooperatives

Some districts participate in cooperative arrangements with other districts. The fiscal agent or manager of the cooperative may be another district, an ESC, or a county. One of the most common types of cooperatives is a special education cooperative, where special education services are shared among member districts. An indicator is shown in the *District Detail* for each district that participates in, or is a fiscal agent of, a special education cooperative. These districts may have per pupil expenditure amounts that differ from expectations because students served through the fiscal agent are not necessarily enrolled in the fiscal agent district. To correct for this problem, any amounts budgeted in fund group 800, fiduciary fund types, have been excluded from the *District Detail* figures presented in this document. Total revenues and expenditures reported in fund group 800 are approximately $94.2 million and $116.1 million, respectively.

## Capital Projects Fund/Facilities

Fund 600, where all capital projects are accounted for, has also been excluded to allow for better comparability between districts.

In response to increasing enrollments, school districts have consistently increased indebtedness to expand facilities, and debt service payments have risen as a result. For the 1992–93 school year, the last year for which data are available, total school district debt was approximately $8.8 billion, compared to $5.4 billion 10 years ago.

During the past three years, school districts have been spending approximately $1.2 billion annually to meet their debt service obligations for principal and interest. For the 1993–94 school year, districts reported they anticipated collecting $1.1 billion in debt service tax revenues. Debt service payments are budgeted to be $1.2 billion, or 6.8 percent of all school district expenditures, excluding capital outlay.

Over 65 percent of all school districts have debt service payments. Among these districts, the average effective debt service tax rate is $0.19. Districts with the highest debt service tax rates are among the poorest in property value per pupil.

# Detailed Statistics

Extensive information about students, student performance, district staff, and district finances for 1993–94 follows. Group summary tables and distribution tables are presented on pages 34 through 57, followed by individual school district data beginning on page 58.

## Category Descriptions

Items are summarized by district size, community type, property wealth, total effective tax rate, and ESC region. A description of each of these summary groups is provided below.

### *Enrollment Groupings*

Districts are grouped by size into nine categories based on the number of students in membership. This is the total number of students in membership in the district on a day in late October of each year. It does not include students who are served by the district but who are not in membership there.

### *Community Type*

Districts are classified on a scale ranging from major urban to rural. Factors such as size, growth rates, and proximity to urban areas are used to determine the appropriate group. The groups are:

- ***Major Urban***
  The largest school districts in the state which serve the seven metropolitan areas of Houston, Dallas, San Antonio, Fort Worth, Austin, Corpus Christi, and El Paso.

- ***Major Suburban***
  Other school districts in and around the major urban areas.

- ***Other Central City***
  The major school districts in other large Texas cities.

- ***Other Central City Suburban***
  Other school districts in and around the other large, but not major, Texas cities.

- ***Independent Town***
  The largest school districts in the counties with populations of 25,000 to 100,000.

- ***Non-Metro: Fast Growing***
  The school districts that fail to be in any of the above categories and that exhibit a five year growth rate of at least 20 percent. These districts must have at least 300 students in membership.

- ***Non-Metro: Stable***
  The school districts that fail to be in any of the above categories, yet the number of students in membership exceeds the state median.

- ***Rural***
  The school districts that fail all of the above tests for placement into a category. These districts either have a growth rate less than 20 percent and the number of students in membership is between 300 and the state median, or the number of students in membership is less than 300.

### *Total Effective Tax Rates*

Districts are grouped into four tax effort categories, or quartiles, with approximately equal numbers of districts in each. This category shows the total effective tax rate, which is determined by dividing the 1993 total levy amount by the 1993 total taxable property value (as certified by the Comptroller's Property Tax Division). The six special statutory districts are in a separate category because they do not levy property taxes.

### *Property Wealth*

Wealth is defined as total taxable property value divided by the total number of students and is used as an indicator of a district's ability to raise local funds on a per pupil basis. The property value used is total taxable value for 1993 as determined by the Comptroller's Property Tax Division. The total number of students is for the 1993-94 school year. Districts are classified into 20 categories with approximately equal numbers of students in each, or approximately five percent of total students per category. The six special statutory districts form a separate group because they have no taxable property wealth.

### *Education Service Center Regions*

The state is divided into 20 geographic regions, each served by an Education Service Center. The number of districts assigned to each ESC region varies.

## Distribution Statistics

This information is presented to help readers better understand the distribution of values of a particular item among Texas public school districts. By examining the variance between the high, low, and intermediate values, it is possible to determine whether districts have similar characteristics, as in the case of pupil to teacher ratios, or very different characteristics, as in the case of the total number of students.

Each item is analyzed independently: the district with the highest value for one item is not necessarily the district with the highest value for other items. The terms used are defined as follows:

- ***Lowest (Highest) Value***
  For any given item, the lowest (highest) value found among all the districts.

- ***XXth Percentile***
  For any given item, a value at the point in the distribution where XX percent of the school districts are below the value. For example, the 10th percentile means that 10 percent of the school districts have values lower than the value shown.

- ***Median***
  For any given item, the value at the point in the distribution where half of the school districts are below the value, and half are above.

- ***State of Texas***
  For most items this is the sum of all the reported district values. For ratios or percent calculations, the state total is computed as the sum of all the numerators, divided by the sum of all the denominators. For these items, the state statistic is a weighted state average.

## District Detail

The information for school districts is sequenced such that all 87 data items are presented in a six page layout for approximately 25 districts at a time. The 87 items pertain to students, student performance, district staff, and district finances.

Districts are sequenced alphabetically within counties. Counties are numbered and are also arranged alphabetically. To locate a particular district by name, see the *District Listing* in the appendix. This listing provides the county and county number needed to find a district in *District Detail* section. As with the grouped reports (size, type, tax effort, wealth, ESC regions) and *Distribution Statistics*, a state summary line concludes the *District Detail*.

Definitions of the 87 data items begin on page 292.

# Appendix

## Item Definitions

Items are defined in the sequence they appear in the *District Detail* section of the report. The data items are numbered to correspond with numbers used in the column headings. To ascertain data sources for these items, refer to the *Data Sources* appendix which cross-references sources with the items defined below.

**COUNTY NUMBER AND NAME:** The county number is a unique identifier assigned to each county for administrative purposes. The numbers correspond to the alphabetic arrangement of county names. *(Source: Organization Master Files)*

**DISTRICT NAME:** The name of the district which includes a designator for the governance system. These designators are:

**ISD (Independent School District)**: A locally elected board of trustees governs the district.
**CSD (Common School District):** The county commissioners court governs the school district.
**MSD (Municipal School District):** The city council governs the school district.

Most school districts are independent school districts. Due to space limitations, the "ISD" designation has been omitted but other governance designators have been retained. *(Source: Organization Master Files)*

**REGION:** The Education Service Center region to which the district is assigned based upon its geographic location. There are 20 ESCs serving districts in the various areas of the state. *(Source: Organization Master Files)*

**CO-OP STATUS:** An indicator of whether or not a district participates in a Special Education cooperative. An "F" indicates the district is a fiscal agent, an "M" indicates the district is a member, and a blank means the district does not participate. For these districts, dollar amounts per student may be distorted because student counts and budgeted expenditures may be reported by different districts. Districts participating in other types of cooperatives are not indicated. *(Source: Special Ed. Co-ops)*

1. **ACCREDITATION STATUS:** The accreditation status of the district as of September 1994. Districts are classified as either EX-Exemplary; RE-Recognized; AC-Accredited; or, AW- Accredited Warned. Approximately 94 percent of the districts in the state are accredited. See the TEA publication *Accountability Manual: The 1994-95 Accountability Rating System for Texas Public Schools and School Districts* for a detailed description of the 1994 accountability criteria and standards. *(Source: Division of Performance Reporting)*

2. **TOTAL NUMBER OF SCHOOLS:** A count of campuses in a district which have a unique state-assigned nine-digit identifier and had students enrolled as of October 29, 1993. *(Source: Organization Master Files; PEIMS, 110)*

3. **NUMBER OF REGULAR HIGH SCHOOLS:** The number of high school campuses in a district identified by the range of grades offered as reported to TEA. Seventy-nine percent of the schools that are classified as high schools offer grades 9-12. *See Exhibit B* in the *End Notes* for the details of other grade configurations which are categorized as high schools. *(Source: Organization Master Files)*

4. **TOTAL STUDENTS:** The number of students in membership as of October 29, 1993, in grades pre-kindergarten through twelve. Membership is defined as the count of students enrolled with an average daily attendance status code that is not equal to zero. Students with a status code of zero, meaning enrolled but not in membership, are not included in this item. Statewide, 6,422 students, or 0.2 percent of all students, are not included in this item. *(Source: PEIMS, 110)*

5. **FIVE YEAR % CHANGE IN TOTAL STUDENTS:** The percent change in total students for the five year period from 1988-89 to 1993-94. *(Sources: Fall Survey of Pupils; PEIMS, 110)*

6. **% AFRICAN AMERICAN:** Percentage of total students reported as African American. *(Source: PEIMS, 110)*

7. **% HISPANIC:** Percentage of total students reported as Hispanic. *(Source: PEIMS, 110)*

8. **% WHITE:** Percentage of total students reported as white. *(Source: PEIMS, 110)*

9. **% OTHER:** Percentage of total students reported as other. Other is the combination of Asian/Pacific Islander and Native American counts. *(Source: PEIMS, 110)*

10. **% ECONOMICALLY DISADVANTAGED:** Percentage of total students reported as economically disadvantaged. Economically disadvantaged students are those who are eligible for free meals under the National School Lunch and Child Nutrition Program, reduced-price meals under the National School Lunch and Child Nutrition Program, or other public assistance.

    Students reported with any one of these three status codes may or may not be enrolled in a special program such as compensatory or special education. *(Source: PEIMS, 110)*

11. **% SPECIAL EDUCATION:** Students identified as participating in special education expressed as a percent of total students. Students in special education may also be counted in another special program such as career and technology or bilingual education. *(Source: PEIMS, 110)*

12. **% BILINGUAL/ESL EDUCATION:** Students identified as participating in Bilingual Education or English as a second language (ESL) expressed as a percent of total students. Students in bilingual/ESL education may also be counted in another special program such as special education or career and technology. *(Source: PEIMS, 110)*

13. **% CAREER AND TECHNOLOGY EDUCATION:** Students identified as taking career and technology education courses expressed as a percent of total students. Students taking these courses may also be counted in another special program such as special or bilingual education. *(Source: PEIMS, 110)*

14. **% GIFTED AND TALENTED EDUCATION:** Students identified and served in state-approved gifted and talented programs expressed as a percent of total students. Students in gifted and talented education may also be counted in another special program such as career and technology or bilingual education. *(Source: PEIMS, 110)*

15. **ATTENDANCE RATE:** The total number of days students were present in 1992-93 divided by the total number of days students were in membership in 1992-93. Only students in grades 1 through 12 are included in the calculations. Computations of attendance rates in prior editions of *Snapshot* were based on the second six weeks reporting period rather than attendance for the entire school year. *(Source: PEIMS, 400)*

16. **ANNUAL DROPOUT RATE 92-93 (METHOD II):** The total number of 1992-93 dropouts reported in grades 7-12 expressed as a percent of the total number of students in membership in grades 7-12 during 1992-93. This rate differs from dropout rates reported in previous *Snapshot* publications in two major ways: 1) dropouts reported by districts were subjected to a more extensive recovery process than that used in prior years; and, 2) the denominator reflects the total count of 7th through 12th graders in membership during the year rather than the count of students in these grades on a day in late October.

    Districts with 7th-12th graders which reported that no students dropped out have a zero (0) dropout rate. If dropout data are not required for a district because only lower grades are offered, then an "n/a" is printed. "LT5" will appear in cases where there were fewer than five 7th-12th graders, to protect the students' anonymity. *(Source: PEIMS, 110, 201)*

17. **NUMBER OF GRADUATES (CLASS OF 1993):** The number of students who graduated during the 1992-93 school year, including the summer of 1993. Counts of graduates identified as receiving special education services are included in this total. *(Source: PEIMS, 202)*

18. **% PASSING ALL TESTS TAKEN:** For grades 3 through 8 and 10 and all subject areas, the total number of students who passed all the tests they attempted, expressed as a percentage of the total number of students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested, to protect the students' anonymity. If no students were tested, an "n/a" is printed. *(Source: TAAS)*

19. **% PASSING READING:** For all grades, the total number of students who passed reading, expressed as a percentage of the total number of students taking reading tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested, to protect the students' anonymity. If no students were tested, an "n/a" is printed. In the spring of 1994, reading was administered to students in grades 3 through 8 and 10. *(Source: TAAS)*

20. **% PASSING WRITING:** For all grades, the number of students who passed writing, expressed as a percentage of the total number of students taking writing tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested, to protect the students' anonymity. If no students were tested, an "n/a" is printed. In the spring of 1994, writing was administered to students in grades 4, 8, and 10 only. *(Source: TAAS)*

21. **% PASSING MATHEMATICS:** For all grades, the number of students who passed mathematics, expressed as a percentage of the total number of students taking mathematics tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested, to protect the students' anonymity. If no students were tested, an "n/a" is printed. In the spring of 1994, mathematics was administered to students in grades 3 through 8 and 10. *(Source: TAAS)*

22. **% AFRICAN AMERICAN STUDENTS PASSING:** For grades 3 through 8 and 10 and all subject areas, the number of African American students who passed all the tests they attempted, expressed as a percentage of the total number of African American students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested, to protect the students' anonymity. If no students were tested, an "n/a" is printed. *(Source: TAAS)*

23. **% HISPANIC STUDENTS PASSING:** For grades 3 through 8 and 10 and all subject areas, the number of Hispanic students who passed all the tests they attempted, expressed as a percentage of the total number of Hispanic students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested, to protect the students' anonymity. If no students were tested, an "n/a" is printed. *(Source: TAAS)*

24. **% WHITE STUDENTS PASSING:** For grades 3 through 8 and 10 and all subject areas, the number of white students who passed all the tests they attempted, expressed as a percentage of the total number of white students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested, to protect the students' anonymity. If no students were tested, an "n/a" is printed. *(Source: TAAS)*

25. **% OTHER STUDENTS PASSING:** For grades 3 through 8 and 10 and all subject areas, the number of Asian/Pacific Islander and Native American students who passed all the tests they attempted, expressed as a percentage of the total number of Asian/Pacific Islander and Native American students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested, to protect the students' anonymity. If no students were tested, an "n/a" is printed. *(Source: TAAS)*

26. **% ECONOMICALLY DISADVANTAGED STUDENTS PASSING:** For grades 3 through 8 and 10 and all subject areas, the number of economically disadvantaged students who passed all the tests they attempted, expressed as a percentage of the total number of economically disadvantaged students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested, to protect the students' anonymity. If no students were tested, an "n/a" is printed. *(Source: TAAS)*

27. **PERCENT TESTED (CLASS OF 1993):** The count of students expected to graduate who took either the Scholastic Aptitude Test (SAT) or the enhanced ACT of the American College Testing program at least once prior to May 1993, expressed as a percent of all graduates. Note that the count of graduates in the denominator does not include special education graduates. *(Source: SAT/ACT File)*

607

608

28. **PERCENT AT OR ABOVE CRITERION (CLASS OF 1993):** The count of students expected to graduate who scored at or above the criterion score on either test (1000 on the SAT and 24 on the ACT) expressed as a percent of all graduates. Note that the count of graduates in the denominator does not include special education graduates. *(Source: SAT/ACT File)*

29. **SAT MEAN TOTAL SCORE (CLASS OF 1993):** The sum of the mathematics and verbal portions of the SAT divided by the number of students tested. Total scores for the SAT range from 400 to 1600. These results include the most recent scores received by graduates on an SAT taken anytime during their high school years. Scores are reported for 12th graders who expected to graduate during the 1992-93 school year.

    If no students were tested or no scores were reported, then an "n/a" is printed. "LT5" will appear in cases where fewer than five students were tested, to protect the confidentiality of the students' test scores. *(Source: SAT/ACT File)*

30. **ACT MEAN COMPOSITE SCORE (CLASS OF 1993):** The average of the scores from the English, mathematics, reading, and science reasoning portions of the ACT, created by summing the score on each portion and dividing by the number of students tested. Composite scores for the ACT range from 1 to 36. Composite scores include only the most recent scores received by graduates during either their junior or senior years. Scores are reported for 12th graders who expected to graduate during the 1992-93 school year.

    Since October 1989, a revised ACT, the Enhanced ACT Assessment, has been administered. All uses of the term ACT in this publication refer to this revised test.

    If no students were tested or no scores were reported, then an "n/a" is printed. "LT5" will appear in cases where fewer than five students were tested, to protect the confidentiality of students' test scores. *(Source: SAT/ACT File)*

31. **TOTAL STAFF FTE:** A count of all personnel employed by the school district as of fall 1993, including both professional and non-professional positions. All staff counts are expressed as full-time equivalents. The appropriate portion of an FTE is allocated to each of the responsibilities associated with an individual based on a percentage of total time worked. *(Source: PEIMS, 050)*

32. **TOTAL TEACHER FTE:** The FTE count of personnel categorized as teachers, including special duty and substitute teachers. *(Source: PEIMS, 050, 090)*

33. **% CENTRAL ADMINISTRATIVE:** The FTE count of personnel classified as administrators in the central office, expressed as a percent of total staff FTEs. Central office administrators include superintendents, assistant superintendents, business managers, tax assessor collectors, and directors of personnel, as well as instructional officers and athletic directors if reported with a '700' campus code. *See Exhibit E* in the *End Notes* for a complete listing. *(Source: PEIMS, 050, 090)*

34. **% CAMPUS ADMINISTRATIVE:** The FTE count of personnel classified as campus administrators, expressed as a percent of total staff FTEs. Campus administrators include principals and assistant principals, as well as instructional officers and athletic directors if reported with a campus code other than '700'. *See Exhibit E* in the *End Notes* for a complete listing. *(Source: PEIMS, 050, 090)*

35. **% PROFESSIONAL SUPPORT STAFF:** The FTE count of personnel categorized as support staff expressed as a percent of total staff FTEs. Support staff are defined as therapists, psychologists, counselors, diagnosticians, physicians and nurses, librarians, supervisors, department heads, registrars, and miscellaneous other support roles. *See Exhibit E* in the *End Notes* for a complete listing. *(Source: PEIMS, 050, 090)*

36. **% TEACHERS:** The teacher FTE count expressed as a percent of total staff FTEs. *(Source: PEIMS, 050, 090)*

37. **% EDUCATIONAL AIDES:** The FTE count of personnel categorized as educational aides expressed as a percent of total staff FTEs. Educational aides perform routine classroom tasks under the general supervision of a certified teacher or teaching team. *(Source: PEIMS, 050, 090)*

38. **% AUXILIARY STAFF:** The FTE count of personnel categorized as auxiliary staff expressed as a percent of total staff FTEs. Auxiliary staff are those personnel for whom no role was reported. Examples include cafeteria workers and bus drivers. *(Source: PEIMS, 050, 090)*

39. **AVERAGE CENTRAL ADMINISTRATIVE SALARY:** The total salary of central administrators divided by the total FTE count of central administrators. The total salary amount is base pay only; any supplements are excluded. *(Source: PEIMS, 060)*

40. **AVERAGE CAMPUS ADMINISTRATIVE SALARY:** The total salary of campus administrators divided by the total FTE count of campus administrators. The total salary amount is base pay only; any supplements are excluded. *(Source: PEIMS, 060)*

41. **AVERAGE PROFESSIONAL SUPPORT STAFF SALARY:** The total salary of professional support staff divided by the total FTE count of professional support staff. The total salary amount is base pay only; any supplements are excluded. *(Source: PEIMS, 060)*

42. **AVERAGE TEACHER SALARY:** The total salary of teachers divided by the total FTE count of teachers. The total salary amount is base pay only; any supplements are excluded. *(Source: PEIMS, 060)*

43. **% MINORITY:** The FTE count of all personnel reported as non-white expressed as a percent of total staff FTEs. *(Source: PEIMS, 040)*

44. **RATIO OF STUDENTS TO TOTAL STAFF:** The total number of students divided by the total staff FTE count. *(Source: PEIMS, 050, 110)*

45. **RATIO OF STUDENTS TO TEACHERS:** The total number of students divided by the total teacher FTE count. *(Source: PEIMS, 090, 110)*

46. **% TEACHERS WITH 1 OR MORE PERMITS:** The FTE count of teachers holding at least one permit as of fall 1993, expressed as a percent of the total teacher FTE count. Teachers with multiple permits are counted only once.

ESCs issue four types of permits that meet different situations and require different qualifications: emergency teaching, nonrenewable, special assignment, and vocational. District superintendents may activate temporary classroom assignment permits without TEA approval. Teachers holding one or more of any of these types of permits are included in the count. *(Source: PEIMS, 081)*

47. **% WITH 5 OR FEWER YEARS OF EXPERIENCE:** The FTE count of teachers with zero through five total years of professional experience expressed as a percent of the total teacher FTE count. Total years of professional experience includes experience earned in another Texas school district or in another state. *(Source: PEIMS, 040)*

48. **AVERAGE YEARS OF EXPERIENCE:** A weighted average obtained by multiplying each teacher's FTE count by his or her years of experience, summing for all weighted counts, and then dividing by total teacher FTEs. Adjustments have been made so that teachers with zero years of experience are appropriately weighted in the formula. *(Source: PEIMS, 040)*

49. **% WITH ADVANCED DEGREES:** The FTE count of teachers with master's or doctoral degrees expressed as a percent of total teachers. *(Source: PEIMS, 040)*

50. **TEACHER TURNOVER RATE:** The total FTE count of teachers not employed in the district in the fall of 1993–94 who were employed in the district in the fall of 1992–93, divided by the total teacher FTE count for the fall of 1992–93. *(Source: PEIMS, 040)*

51. **% AFRICAN AMERICAN:** The FTE count of teachers reported as African American expressed as a percent of total teacher FTEs. *(Source: PEIMS, 040)*

52. **% HISPANIC:** The FTE count of teachers reported as Hispanic expressed as a percent of total teacher FTEs. *(Source: PEIMS, 040)*

53. **% WHITE:** The FTE count of teachers reported as white expressed as a percent of total teacher FTEs. *(Source: PEIMS, 040)*

54. **% OTHER:** The FTE count of teachers reported as Asian/Pacific Islander or Native American expressed as a percent of total teacher FTEs. *(Source: PEIMS, 040)*

55. **% REGULAR EDUCATION:** The FTE count of teachers identified as serving students receiving regular education instruction, expressed as a percent of total teacher FTEs. *(Source: PEIMS, 090)*

56. **% SPECIAL EDUCATION:** The FTE count of teachers identified as serving students receiving special education instruction, expressed as a percent of total teacher FTEs. *(Source: PEIMS, 090)*

57. **% COMPENSATORY EDUCATION:** The FTE count of teachers identified as serving students receiving compensatory education instruction, expressed as a percent of total teacher FTEs. *(Source: PEIMS, 090)*

58. **% BILINGUAL/ESL EDUCATION:** The FTE count of teachers identified as serving students receiving bilingual education or English as a Second Language (ESL) instruction, expressed as a percent of total teacher FTEs. *(Source: PEIMS, 090)*

59. **% CAREER AND TECHNOLOGY EDUCATION:** The FTE count of teachers identified as serving students receiving career and technology education instruction, expressed as a percent of total teacher FTEs. *(Source: PEIMS, 090)*

60. **% OTHER EDUCATION (INCLUDES GIFTED AND TALENTED):** The FTE count of teachers identified as serving students receiving gifted and talented education instruction, students in honors classes, and students served in migrant programs, expressed as a percent of total teacher FTEs. On average, 98 percent of this category consists of teachers serving gifted and talented or honor students. *(Source: PEIMS, 090)*

61. **TAXABLE VALUE PER PUPIL:** The district's total taxable property value in 1993 as determined by the Comptroller's Property Tax Division (CPTD), divided by the total number of students in the district in 1993–94. This per pupil figure is often referred to as "wealth". Property value is determined by the CPTD as part of its annual study which attempts to present uniformly appraised property valuations statewide. The CPTD value is calculated by applying ratios created from uniform independent appraisals to the district's assessed valuations. *(Sources: CPTD, Study; PEIMS, 110)*

62. **EQUALIZED TOTAL TAX RATE:** The sum of the district maintenance and operation (M&O) and debt service (Interest & Sinking fund) effective tax rates. The components of this total rate are calculated by dividing the 1993 levy amounts by the taxable value for 1993. Rates are expressed per $100 of taxable value. (NOTE: The CPTD taxable value is not the same as the locally assessed value.) *(Sources: CPTD, Study; CPTD, Self Report)*

63. **STATE AID PER PUPIL:** The amount of state money allocated to the school district under the Foundation School Program divided by each district's total student count. *(Sources: Foundation Master; PEIMS, 110)*

64. **TOTAL REVENUE:** Budgeted revenue from all local, state, and federal sources, except for receipts from the sale of bonds and other revenues budgeted in fund 600, the capital projects fund. *See Exhibit D* in the *End Notes* for a technical description of this item. *Bulletin 679, Financial Accounting Manual*, sets standards for the accounting of revenues. *(Source: PEIMS, 030).*

65. **TOTAL REVENUE PER PUPIL:** Total revenue divided by total students. *(Source: PEIMS, 030, 110)*

66. **% STATE:** Revenue from state sources, such as per capita and foundation program payments, revenue from other state funded programs and revenue from other state agencies, expressed as a percent of total revenue. *See Exhibit D* in the *End Notes* for a technical description of this item. *(Source: PEIMS, 030)*

67. **% LOCAL AND OTHER:** Revenue from local taxes, other local sources, and intermediate sources expressed as a percent of total revenue. *See Exhibit D* in the *End Notes* for a technical description of this item. *(Source: PEIMS, 030)*

68. **% FEDERAL:** Revenue received directly from the federal government or distributed by the TEA for career and technology education, for programs for educationally disadvantaged children, for food service programs, and for other federal programs, expressed as a percent of total revenue. *See Exhibit D* in the *End Notes* for a technical description of this item. *(Source: PEIMS, 030)*

69. **FUND BALANCE (END OF 92–93):** For each district, the amount of unencumbered surplus fund balance that existed at the end of the 1992-93 school year. In most districts, this amount is equivalent to the fund balance at the beginning of 1993-94. *(Source: Financial Audit Report)*

70. **% FUND BALANCE (OF 93–94 BUDGET):** The amount of unencumbered surplus fund balance expressed as a percent of the total budgeted expenditures for the current year (1993-94). *(Source: Financial Audit Report)*

71. **TOTAL EXPENDITURES:** Budgeted outlays of money for all functions and objects, except for expenditures budgeted in fund 600, the capital projects fund. *Bulletin 679, Financial Accounting Manual* sets standards for the accounting of expenditures.

Expenditures are accounted for using codes for fund, function, object, organization, and in some cases, program area. *See Exhibit D* in the *End Notes* for a technical description of this item. *(Source: PEIMS, 030)*

72. **% INSTRUCTIONAL:** The percentage of total expenditures budgeted for instructional expenditures in the district. Instructional expenditures include expenditures for all activities dealing directly with the instruction of pupils, including instruction aided with computers. *See Exhibit D* in the *End Notes* for a technical description of this item. *(Source: PEIMS, 030)*

73. **% CENTRAL ADMINISTRATIVE:** The percentage of total expenditures budgeted for central administration expenditures in the district. Central administrative expenditures include expenditures for the general administration of the district, the development of personnel and curriculum, and data processing services. *See Exhibit D* in the *End Notes* for a technical description of this item. *(Source: PEIMS, 030)*

74. **% CAMPUS ADMINISTRATIVE:** The pecentage of total expenditures budgeted for campus administration expenditures in the district. Campus administration expenditures include expenditures for the operation and management of a school. *See Exhibit D* in the *End Notes* for a technical description of this item. *(Source: PEIMS, 030)*

75. **% PLANT SERVICES:** The percentage of total expenditures budgeted for physical plant maintenance and operation. *See Exhibit D* in the *End Notes* for a technical description of this item. *(Source: PEIMS, 030)*

76. **% OTHER OPERATING:** The percentage of total expenditures budgeted for all other operating expenditures in the district. Other operating expenditures include expenditures for support services, pupil transportation, food services, and cocurricular activities. *See Exhibit D* in the *End Notes* for a technical description of this item. *(Source: PEIMS, 030)*

77. **% NON-OPERATING:** The percentage of total expenditures budgeted for non-operating expenditures in the district. Non-operating expenditures include capital outlay expenditures not made from fund 600, the capital projects fund; debt service expenditures; and, ancillary services expenditures. *See Exhibit D* in the *End Notes* for a technical description of this item. *(Source: PEIMS, 030)*

78. **TOTAL OPERATING EXPENDITURES:** The sum of all expenditures budgeted for the operation of the district. The operating expenditures are a subset of the total expenditures; they do not include debt service, capital outlay, or ancillary services. See *Exhibit D* in the *End Notes* for a technical description of this item. *(Source: PEIMS, 030)*

79. **TOTAL OPERATING EXPENDITURES PER PUPIL:** Total operating expenditures divided by total students. *(Sources: PEIMS, 030, 110)*

80. **TOTAL INSTRUCTIONAL EXPENDITURES:** The sum of budgeted expenditures for all activities dealing directly with the instruction of pupils, including instruction through the use of computers. This is the amount used in the percent calculation for item 72. *(Source: PEIMS, 030)*

81. **TOTAL INSTRUCTIONAL EXPENDITURES PER PUPIL:** Budgeted instructional expenditures divided by total students. *(Sources: PEIMS, 030, 110)*

82. **% REGULAR EDUCATION:** Expenditures budgeted for the regular education program expressed as a percent of total instructional expenditures. *See Exhibit D* in the *End Notes* for a technical description of this item. *(Source: PEIMS, 030)*

83. **% SPECIAL EDUCATION:** Expenditures budgeted for the special education program expressed as a percent of total instructional expenditures. *See Exhibit D* in the *End Notes* for a technical description of this item. *(Source: PEIMS, 030)*

84. **% COMPENSATORY EDUCATION:** Expenditures budgeted for the compensatory education program expressed as a percent of total instructional expenditures. *See Exhibit D* in the *End Notes* for a technical description of this item. *(Source: PEIMS, 030)*

85. **% BILINGUAL/ESL EDUCATION:** Expenditures budgeted for the bilingual education and English as a second language programs expressed as a percent of total instructional expenditures. *See Exhibit D* in the *End Notes* for a technical description of this item. *(Source: PEIMS, 030)*

86. **% CAREER AND TECHNOLOGY EDUCATION:** Expenditures budgeted for the career and technology education program expressed as a percent of total instructional expenditures. *See Exhibit D* in the *End Notes* for a technical description of this item. *(Source: PEIMS, 030)*

87. **% GIFTED AND TALENTED EDUCATION:** Expenditures budgeted for the gifted and talented education program expressed as a percent of total instructional expenditures. *See Exhibit D* in the *End Notes* for a technical description of this item. *(Source: PEIMS, 030)*

## Data Sources

Data sources are arranged in alphabetical order by the abbreviations used in the *Item Definitions* section.

**CPTD, SELF REPORT:** The *Comptroller's Property Tax Division 1993 Self Report*. This report contains local tax roll assessed values for property, levy amounts, and tax rate information for all school districts with taxable property. *Item 62; Exhibit 22.*

**CPTD, STUDY:** The *Comptroller's Property Tax Division 1993 Property Value Study*, July 1, 1994. This study provides local tax roll property values as of January 1, 1993 for each district by category of land use. The Comptroller's re-evaluated values by category of land use are also provided. *Items 61, 62; Exhibit 22.*

**DIVISION OF EDUCATOR ASSESSMENT AND APPRAISAL:** A Texas Education Agency division that is responsible for developing and managing assessment programs for evaluating candidates' preparation for certification including the Examination for the Certification of Educators in Texas (ExCET). *Exhibit 18.*

**DIVISION OF PERFORMANCE REPORTING:** A Texas Education Agency division that is responsible, as part of its function, for determining the accreditation status for school districts each year. Computer programs are used to analyze TAAS results, dropout rates, attendance rates, and college admission test performance in order to determine accreditation status. See the TEA publication *Accountability Manual: The 1994-95 Accountability Rating System for Texas Public Schools and School Districts* for more information about the 1994 accountability criteria and standards. Accreditation status in this publication was current as of September 1994. *Item 1.*

**FALL SURVEY OF PUPILS:** *The Fall Survey of Pupils in Membership* taken in October 1988. This report provided a one day head count of the total number of students enrolled on the first Monday of October each school year. Counts of students were collected by campus, by grade, by ethnicity, by gender, and by population type (either regular or special education). This report was discontinued after the 1989-90 school year. Beginning with the 1990-91 school year, counts of students were collected through PEIMS. *Item 5.*

**FINANCIAL AUDIT REPORT:** TEA data files created from reports submitted to the TEA by auditors hired by local districts. The December 1993 reports used in this edition reflect district audited financial data from the 1992-93 school year. In addition to fund balance information, these reports provide total outstanding debt for bonds and loans, delinquent tax information, and revenue and expenditure amounts. School-level information is not provided. *Items 69, 70.*

**FOUNDATION MASTER:** A TEA data file that contains detailed information about state funding amounts and calculations for each entity receiving state dollars under the Foundation School Program. *Item 63.*

**Organization MASTER FILES:** TEA data files containing basic organizational attributes about schools and school districts, including name and identification number, county name and number, Education Service Center region, State Board of Education district, type of district (regular FSP, special statutory, or state-administered), and mailing address. *Items 2, 3; Exhibits 1-3.*

**PEIMS:** Information in this document from the *Public Education Information Management System* was reported either in the spring (submission 3) of the 1992-93 year, or in the fall (submission 1) of the 1993-94 year. In submission 1 districts reported data as of October 29, 1993. The budgeted financial data reported at that time was for the entire 1993-94 school year. In submission 3 districts reported year-long student information. The information was due to the agency July of 1993. All record types described below were received in submission 1 of school year 1993-94 with the exception of record type 400, which is from submission 3 of school year 1992-93. For more information about the PEIMS reporting requirements see the *1993-94 Public Education Information Management System Data Standards.*

**030: Budget Amounts.** Amounts budgeted by the district, or campus if appropriate, reported by fund, function, object, and in some cases by program. *Items 64-68, 70-87; Exhibits 21, 23-26.*

**040: Staff Demographics.** Information about each employee's sex, ethnicity, years of experience, and post-secondary degree. *Items 43, 47-49, 51-54; Exhibit 17.*

**050: Employment Characteristics.** Information for each employee such as tenure and full-time equivalency status, and employing district identification number. *Items 31-38, 44, 50.*

**060: Payroll.** The payroll amounts paid to each employee. Both base pay and any supplement amounts are reported by fund, function, object, and program. *Items 39-42; Exhibits 15,19.*

**081: Permit.** The type of permit, issue date, renewal date, role of the individual teaching under the permit, and permit subject area. *Item 46.*

**090: Responsibilities.** The duties performed by each professional employee. Districts report each class schedule for the employees who are teachers. *Items 32-38, 45, 50, 55-60; Exhibits 15, 16.*

**110: Student Enrollment.** Enrollment information about each student, including the student's grade, economically disadvantaged status, and indicators of the special programs in which the student participates. *Items 4-14, 44, 45, 61, 63, 65, 79, 81; Exhibits 1, 4-7.*

**201: Basic Dropout Data.** Last known information about a dropout; last campus of enrollment, grade level, special education indicator, economically disadvantaged indicator, and exit reason. This record also contains demographic information about the dropout such as sex, ethnicity, and age. *Item 16; Exhibits 7-9.*

**202: Basic Graduate Data.** Information about each graduate, including the date of graduation, college plans, and whether or not the graduate earned an advanced seal on his or her transcript. *Item 17; Exhibit 7.*

**400: Basic Attendance Data.** Information about each student for each of the six six-week attendance reporting periods in the year. For each student, for each six week period, districts report grade level, number of days taught, days absent, and total eligible and ineligible days present. *Items 15, 16.*

**SAT/ACT FILE:** With permission from public school districts, a file was created by the TEA from Scholastic Aptitude Test (SAT) scores released by the College Board's Admissions Testing Program and from ACT scores released by the American College Testing Program for Texas graduating seniors. Both testing programs typically release summary test score statistics to the TEA, the media, and the public each August for Texas seniors who graduated during the previous school year. However, the more detailed data linking students' scores to campuses and districts (which are used to create the TEA file) typically become available later in the calendar year. Thus, with this

619

620

publication schedule, the test scores in this document are for 1992-93 graduating seniors. *Items 27-30; Exhibits 13, 14.*

**SPECIAL ED. CO-OPS.:** An annual TEA data file maintained by the Division of Special Education which indicates for each district whether or not the district is a member or fiscal agent of a special education cooperative, the type of district, how many members are in the cooperative, and if applicable, the cooperative name. *No item number; indicator that follows district name.*

**TAAS:** The Texas Assessment of Academic Skills test results for reading, writing, and mathematics summed across grades 3 through 8 and 10 from the spring 1994 test administration. The performance of students who were not enrolled in the district as of October 29, 1993 are not included in the results published here. Also, the results of students receiving special education services have been excluded. TAAS test files contain percent passing by grade and subject and can be further analyzed by several characteristics of the students tested. *Items 18-26; Exhibits 10-12.*

# End Notes

**ACADEMIC EXCELLENCE INDICATOR SYSTEM (AEIS):** A set of indicators mandated by statute to emphasize student achievement for purposes of accountability as well as recognition. *Exhibit A* lists the 1993–94 indicators and notes the corresponding *Snapshot* item numbers for the indicators included in this document.

**ASSESSED VALUATION:** The locally assessed value of property that a district actually taxes. Property values are assessed by county appraisal districts, not the school districts. Assessment practices can vary from district to district; that is, two properties of equal worth may not be appraised at the same value in two different districts. District practices in exempting property from taxation also vary. TEA receives information about locally assessed valuation from the Property Tax Division of the Comptroller's Office of Public Accounts.

**AVAILABLE SCHOOL FUND:** The Available School Fund (ASF) was constitutionally created in 1876. It consists primarily of earnings from the Permanent School Fund and taxes dedicated to the fund by the state constitution. Most of the ASF revenue is distributed to local school districts on a per capita basis which is set by the State Board of Education using annual earnings estimates for the fund. The per capita apportionment to school districts in 1993–94 was $334 per ADA. The ASF also pays for school textbooks.

**AVERAGE DAILY ATTENDANCE (ADA):** Student attendance information is reported for the three six-week periods in the fall and the three six-week periods in the spring through the *Public Education Information Management System (PEIMS)*. For each district, full-year ADA is calculated by summing the ADA for each six-week period and dividing by six.

**CAMPUS TYPE:** Campuses are divided into types according to the range of grades offered as reported to the TEA. The grid in *Exhibit B* shows the possible combinations of low and high grades for each of the campus types. For example, a campus offering a low grade of 5, found along the left edge of the grid, and a high grade of 6, found along the top edge of the grid, is classified as a middle school. A campus offering only grade 9 (both the low and high grade) is a high school.

**COUNTY EDUCATION DISTRICT (CED):** Senate Bill 351 established a second taxing entity to replace the local district in generating revenue for the portion of the Foundation School Program allocation known as the Local Fund Assignment (LFA). County Education Districts were created to equalize the wide range of district property tax bases for school finance purposes. The 188 CEDs, which were made up of one or more counties, generated and distributed revenue to each school district within the CED. CEDs were in existence for only two school years (1991–92 and 1992–93). In 1992, the Texas Supreme Court ruled CEDs to be unconstitutional and they were dissolved effective with the 1993–94 school year under Senate Bill 7.

**CROSSWALK TO PRIOR YEAR ITEMS:** *Exhibit C* provides a comparison of the 88 data items of the 1992-93 edition to the 87 items in this edition.

### EXHIBIT A
### 1993–1994
### Academic Excellence Indicators

| Indicator | Corresponding *Snapshot* Item |
|---|---|
| 1. TAAS | |
| Grades 3–8 and 10 (Exit) | |
| Reading | #19 |
| Writing | #20 |
| Mathematics | #21 |
| All Tests Taken | #18 |
| 2. Attendance Rate | #15 |
| 3. Annual Dropout Rate | #16 |
| 4. % Advanced Courses | n/a |
| 5. TAAS/TASP Equivalency | n/a |
| 6. College Admissions Tests | |
| % Taking Tests | #27 |
| % At or Above Criterion | #28 |
| SAT Mean Total Score | #29 |
| ACT Mean Composite Score | #30 |

**ETHNICITY:** Counts of students and staff are collected by major ethnic group. Counts of student enrollments and staff by ethnic group are derived from the fall 1993 PEIMS collection. These major ethnic groups are African American, Hispanic, white, Asian/Pacific Islander, and Native American. In this publication "other" is presented as the sum of Asian/Pacific Islander and Native American.

**EXPENDITURE FUNCTIONS**: An expenditure function designates the purposes for which expenditures are made. Function codes used by school districts are outlined in section CDE-403 of *Bulletin 679, Financial Accounting Manual*. Functions for which money can be spent are:

| | |
|---|---|
| 11 | Instruction; |
| 21 | Instructional Administration; |
| 22 | Instructional Resources & Media Services; |
| 23 | School Administration; |
| 25 | Curriculum & Instructional Staff Development; |
| 26 | Communication and Dissemination; |
| 31 | Guidance and Counseling Services; |
| 32 | Social Work Services; |
| 33 | Health Services; |
| 34 | Pupil Transportation; |
| 36 | Cocurricular/Extracurricular Activities; |
| 37 | Food Services; |
| 41 | General Administration; |
| 42 | Debt Services; |
| 51 | Plant Maintenance and Operation; |
| 52 | Facilities Acquisition & Construction; |
| 75 | Data Processing Services; and |
| 81 | Community Services. |

*Exhibit D* lists the function codes included in the revenue and expenditure items found in the *District Detail* section.

**EXPENDITURE OBJECTS:** An expenditure object identifies what was purchased. Object codes are outlined in section CDE-409 of *Bulletin 679, Financial Accounting Manual*. Objects for which money can be spent are:

| | |
|---|---|
| 6100 | Payroll Costs; |
| 6200 | Purchased & Contracted Services; |
| 6300 | Supplies & Materials; |

6400 Other Operating Expenditures;
6500 Debt Service; and
6600 Capital Outlay.

*Exhibit D* lists the object codes included in the revenue and expenditure items found in the *District Detail* section.

**FULL-TIME EQUIVALENTS:** All staff counts are shown in terms of full-time equivalents (FTEs), a measure of the extent to which a person occupies a full-time position. For example, a teacher working a full day for the entire school year represents one FTE, a full-time teacher working one semester represents 1/2 FTE, and a teacher carrying a half load for the full year represents 1/2 FTE.

FTE apportionments apply to both part-time and full-time staff performing multiple duties. In cases where a person performs multiple tasks, portions of that person's FTE are assigned according to the time spent at each duty. For example, a full-time person employed half the time as a teacher and half as an administrator would be counted as a 0.5 administrator FTE and a 0.5 teacher FTE.

**GUARANTEED YIELD:** In 1993–94, this component of the Foundation School Program guaranteed districts $20.55 per student, per penny of tax effort levied by the school district. The school district tax effort is that tax rate adopted by the district. Regardless of the portion of the $20.55 the local district is able to raise through a penny of tax effort, the state will contribute the rest, up to a total of $20.55. Districts able to generate $20.55 per student, per penny of effort on their own receive no state guaranteed yield funds. The guaranteed yield is also referred to as the second tier of the Foundation School Program.

**LOCAL FUND ASSIGNMENT:** The portion of the Foundation School Program allocation, as determined by state formulas, that is assigned to the district to raise. In 1993-94, districts wishing to participate in the FSP were required to levy a property tax of $0.86. While the tax rate for the LFA is fixed for all districts, the dollar amount of the LFA, or local share, varies with the district's property wealth. The poorer the district, the smaller the LFA and the greater the amount of state aid.

**PEIMS:** The *Public Education Information Management System* is the primary means through which the Texas Education Agency collects information on the staff, students and finances for all schools and school districts in the state.

**STAFF CATEGORIES DEFINED BY ROLE ID:** Staff information from the fall 1993 PEIMS responsibility records was aggregated into categories using the reported role identifiers. *Exhibit E* lists this detail.

| 059 | School / Home / Community Liaison |
| 080 | Other Non-Campus Professional Personnel |

The FTEs of Adult Basic Education staff or staff employed by special education cooperatives are not included in the information presented in this document. Adult Basic Education staff are identified as having either Adult Basic Education service codes or as being paid from fund code 31 or 80, meaning Adult Basic Education Fund and Trust and Agency Funds, respectively. Staff are identified as participants in a cooperative if their assigned campus number belongs in a district different from their employing district, or if they are reported with a campus number of 701. Only the portion of a person's total FTE amount associated with the campus in another district (or with the 701 record) was counted as cooperative.

**STATE BOARD OF EDUCATION-MAP OF DISTRICT BOUNDARIES:** The map in *Exhibit F* illustrates the 15 SBOE district boundaries. Members of the SBOE are identified on page iii of this document with their district number that corresponds to this map.

**TUITION TRANSFERS:** Expenditures that are budgeted by districts for the cost of sending students to other districts for instruction. Because the transferring district does not count the enrollment of transferred students, including the expenditure distorts per pupil amounts. Prior to 1992–93, amounts budgeted for tuition transfers were excluded from the expenditure data presented in this publication. Beginning in 1992–93 the TEA no longer required districts to report the object code that enables these budgeted expenditures to be identified, therefore tuition transfers have not been excluded from expenditures presented in *Snapshot* beginning with the 1992-93 edition. In affected districts, per pupil expenditures may appear to be high as a result.

## COMPLIANCE STATEMENT

**TITLE VI, CIVIL RIGHTS ACT OF 1964; THE MODIFIED COURT ORDER, CIVIL ACTION 5281, FEDERAL DISTRICT COURT, EASTERN DISTRICT OF TEXAS, TYLER DIVISION**

Reviews of local education agencies pertaining to compliance with Title VI Civil Rights Act 1964 and with specific requirements of the Modified Court Order, Civil Action No. 5281, Federal District Court, Eastern District of Texas, Tyler Division are conducted periodically by staff representatives of the Texas Education Agency. These reviews cover at least the following policies and practices:

(1) acceptance policies on student transfers from other school districts;
(2) operation of school bus routes or runs on a non-segregated basis;
(3) nondiscrimination in extracurricular activities and the use of school facilities;
(4) nondiscriminatory practices in the hiring, assigning, promoting paying, demoting, reassigning, or dismissing of faculty and staff members who work with children;
(5) enrollment and assignment of students without discrimination on the basis or race, color, or national origin;
(6) nondiscriminatory practices relating to the use of a student's first language; and
(7) evidence of published procedures for hearing complaints and grievances.

In addition to conducting reviews, the Texas Education Agency staff representatives check complaints of discrimination made by a citizen or citizens residing in a school district where it is alleged discriminatory practices have occurred or are occurring.

Where a violation of Title VI of the Civil Rights Act is found, the findings are reported to the Office for Civil Rights, U.S. Department of Education.

If there is a direct violation of the Court Order in Civil Action No. 5281 that cannot be cleared through negotiation, the sanctions required by the Court Order are applied.

**TITLE VII, CIVIL RIGHTS ACT OF 1964; EXECUTIVE ORDERS 11246 AND 11375; TITLE IX, 1973 EDUCATION AMENDMENTS; REHABILITATION ACT OF 1973 AS AMENDED; 1974 AMENDMENTS TO THE WAGE-HOUR LAW EXPANDING THE AGE DISCRIMINATION IN EMPLOYMENT ACT OF 1967; AND VIETNAM ERA VETERANS READJUSTMENT ASSISTANCE ACT OF 1972 AS AMENDED IN 1974.**

It is the policy of the Texas Education Agency to comply fully with the nondiscrimination provisions of all federal and state laws and regulations by assuring that no person shall be excluded from consideration for recruitment, selection, appointment, training, promotion, retention, or anY other personnel action, or be denied any benefits for participation in any programs or activities which it operates on the grounds of race, religion, color, national origin, sex, handicap, age, or veteran status (except where age, sex, or handicap constitute a bona fide occupational qualification necessary to proper and efficient administration). The Texas Education Agency makes positive efforts to employ and advance in employment all protected groups.
